Introduction

The Queensland Nationals submit the following suggestions for your consideration in redrafting existing Federal Divisional boundaries and creating a new Federal Division in Queensland.

These suggestions comply with the strict prescriptive requirements of the Electoral Act, while at the same time providing a practical guide in addressing Queensland's decentralised and rapidly increasing population trends in both a fair and equitable manner to the communities concerned.

Legislative & Guiding Principles

The Queensland Nationals recognises the creation of a new Federal Division to many may suggest the majority of existing electoral boundaries will be subjected to an extensive degree of alteration and amendment. However, throughout the Nationals' submission we have sought to minimise the disruption to existing and established communities of interest whilst at the same time still meeting the legislative prescriptions of the Electoral Act.

The Queensland Nationals acknowledge the fundamental need for the redistribution process to accommodate the State's existing and projected population growth - a statistical requirement which in some instances outweighs all other rational determinants. In saying this however, the Nationals submission has at all times sought to constrain the disruptive impact of boundary amendments to the region requiring change, and thereby sought to minimise suggesting changes which multiply boundary change across the State.

The Queensland Nationals are confident the Redistribution Committee, in framing it's proposed boundaries, will *give due consideration* to Section 66(3)(b) of the *Commonwealth Electoral Act 1918* which prescribes that:

- community of interests within the proposed Electoral District, including economic, social and regional interests;
- means of communication and travel within the proposed Electoral District;
- the physical features and the area of the proposed Electoral Division; and
- the boundaries of the existing Divisions in the State or Territory."

In high growth areas, divergent interests and groups are redefining 'community of interest' in more minute and urbanised terms. Conversely, in those districts experiencing low or negative growth 'community of interest' is encompassing a wider catchment area.

The challenge facing submissions

In creating an additional Division, taking the total to 28, the Redistribution Committee set the following parameters:

- Current Quota = 84078 plus or minus 10%
- Projected Quota = 93625 plus or minus 3.5%

As the table below shows:

- all Divisions exceeded the minimum current quota requirements;
- two Divisions, namely Brisbane and McPherson exceed the maximum current quota requirements; and,
- the majority of existing Divisions fail to meet the projected quota requirements, with six Divisions failing to meet the minimum requirements and fifteen seats exceeding the legislated maximum.

Clearly, any objective analysis of these statistics shows the need for the creation of a new seat in the State's South-East corner in order to accommodate the massive population growth of this region - while at the same time redressing the shortfalls seen in other regions of the State.

Divisions under the projected quota requirements

The Divisions of Blair, Capricornia, Hinkler, Kennedy, Maranoa, and Wide Bay pose a challenge to the Redistribution Committee - as unlike the trend seen in the South East corner, it is low population growth which forces amendment to existing electoral boundaries.

Blair

The existing Divisional boundaries, whilst meeting the current legislative requirements, fail to meet the projected population requirements. Coupled with the amendments suggested for this and neighbouring Divisions, it is proposed the Division of Blair be comprised as follows:

Capricornia

The existing Divisional boundaries, whilst meeting the current legislative requirements, fail to meet the projected population requirements. Coupled with the amendments suggested for this and neighbouring Divisions, it is proposed the Division of Capricornia be comprised as follows:

TOTALS FOR PROPOSED DIVISION					CURRENT	PROJECTED
					88508	90638
CURRENT LOWER QUOTA (-10%)	75671	DEVIATION FROM LOWER QUOTA			12837	
CURRENT QUOTA	84078	DEVIATION FROM QUOTA			4430	105.27%

Kennedy

The existing Divisional boundaries, whilst meeting the current legislative requirements, fail to meet the projected population requirements. Coupled with the amendments suggested for this and neighbouring Divisions, it is proposed the Division of Kennedy be comprised as follows:

TOTALS FOR PROPOSED DIVISION					CURRENT	PROJECTED
					91866	96387
CURRENT LOWER QUOTA (-10%)	75671	DEVIATION FROM LOWER QUOTA			16195	
CURRENT QUOTA	84078	DEVIATION FROM QUOTA			7788	109.26%

Maranoa

The existing Divisional boundaries, whilst meeting the current legislative requirements, fail to meet the projected population requirements.

Coupled with the amendments suggested for this and neighbouring Divisions, it is proposed the Division of Maranoa be comprised as follows:

TOTALS FOR PROPOSED DIVISION					CURRENT	PROJECTED
					87126	91273
CURRENT LOWER QUOTA (-10%)		75671	DEVIATION FROM LOWER QUOTA		11455	
CURRENT QUOTA		84078	DEVIATION FROM QUOTA		3048	103.63%

Wide Bay

The existing Divisional boundaries, whilst meeting the current legislative requirements, fail to meet the projected population requirements.

Coupled with the amendments suggested for this and neighbouring Divisions, it is proposed the Division of Wide Bay be comprised as follows:

Divisions within the projected quota requirements

The Divisions of Dawson, Groom, Leichhardt, Lilley, Oxley and Rankin all fall within the projected quota requirements. The Nationals recommendations are made on the basis they seek as far as is practicable to minimise unnecessary disruption to those Divisional boundaries that do not require change, whilst at the same time ensuring they contribute to the overall solution needed to address the Statewide situation.

Dawson

In order to assist with the amendments suggested for this and neighbouring Divisions, whilst minimising Divisional boundary changes within the region, it is suggested the Division of Dawson be comprised as follows:

TOTALS FOR PROPOSED DIVISION					CURRENT	PROJECTED

Leichhardt

The existing Divisional boundaries fulfil the legislative requirements in relation to both current and projected population. In order to minimise disruption in the region no alterations should be made to the existing boundaries.

Such a proposal recognises the need to minimise as far as is practicable, the disruption to voters brought about by unnecessary boundary amendments and takes into account the deliberations of the previous Redistribution Committee.

As such, it is recommended the Leichhardt Division be comprised as follows:

TOTALS FOR PROPOSED DIVISION					CURRENT	PROJECTED

Divisions over the projected quota requirements

The Divisions of Bowman, Brisbane, Dickson, Fadden, Fairfax, Fisher, Forde, Griffith, Herbert, Longman, McPherson, Moncrieff, Moreton, Petrie, and Ryan all exceed the projected quota requirements. The Nationals recommendations are made on the basis they seek as far as is practicable to minimise unnecessary disruption to those Divisional boundaries whilst ensuring the legislative requirements are met.

Bowman

In order to assist with the amendments suggested for this and neighbouring Divisions, it is proposed:

The proposed new Division - Riverside

The Queensland Nationals submission proposes the creation of a new Federal Division in the centre of Brisbane - thereby absorbing the high population growth evidenced in the Sunshine Coast, Gold Coast and Brisbane city regions.

The proposed Division, as was the case of the existing Division of Brisbane, straddles the Brisbane River through the inner city area, where there is major infrastructure to facilitate transport and communication flows. Further, the proposed Division also seeks to create a inner-city seat in character, which for the great part seeks to use the Brisbane River as a natural boundary - hence the proposed name of Riverside.

Submission Summary

The Nationals Submission has at all times sought to constrain the disruptive impact of boundary amendments to the region requiring change while at the same time presenting to the Redistribution Committee a solution which meets the strict statistical requirements of the Redistribution process - as demonstrated in the table below.
