To Whom It May Concern,

This letter is in protest, for the proposed Gympie electorate. You are going about this subject the wrong way. Instead of counting heads, you should be looking at the massive production base this electorate has.

You will never build a strong Nation by deleting western electorates. Wheat of the Great Divide is so important to this Nation. You can't build a nation along the eastern coast.

We need more electorates, so we will have things like more railways. So, we can have more inland freight trains and passenger trains so as overseas visitors can see our great nation. If this does not happen in land Australia will become one big vacuum.

Hope this letter might convince you to leave Gympie alone.

Yours Faithfully  
David Wall.
