Redistribution Committee for Queensland

GPO Box 2590

BRISBANE, Qld, 4001

Dear Sir/Madam,

Thank-you for the opportunity to comment on the suggestions for the current federal redistribution for Queensland electorates. Again there have been some spirited suggestions put forward. While there are all kinds of combinations and permutations that can be made for how various seats can be arranged (my suggestions included), I wish to mainly focus on some of the issues surrounding some of the regional seats that have been put forward.

It is clear and understandable that while the residents of Moore Park Beach would prefer to be in a Bundaberg-based electorate, they are in a similar situation to residents in Townsville south of the Ross River that have to vote for a Mackay-based seat, to those in Bakers Creek and Sarina that have to vote for a Rockhampton-based seat, to those in the southern outskirts of Cairns that vote for Mt. Isa and Noosa residents that have to vote for Maryborough. While I would encourage the committee to find a solution to incorporate those residents in the Bundaberg Regional Council who are north of the Burnett River into the seat of Hinkler, I know this is limited by the number of electors located in other regions. In the long term, as noted in my suggestions and others, a rethink on how to orientate the seats based on regional cities is required as the splitting of major cities between seats is highly unsatisfactory.

As noted by several contributors and following on from my last point, it is indeed preferable that Leichhardt be based on Cairns, Herbert on Townsville, Dawson on Mackay, Capricornia on Rockhampton and Hinkler on Bundaberg. Some had even crunched the numbers to see how this would occur. The problem of this is how seats like Kennedy and Maranoa grow in size and contort in weird ways. Inspired by others, I attempted the sums myself for Leichhardt, Herbert, Kennedy, Dawson, Capricornia, Flynn and Maranoa. I have avoided altering Hinkler as this would alter the numbers I had worked out in my submitted suggestion to the redistribution.

Capricornia		Dawson		Leichhardt	
SA2	Projected Enrolment	SA2	Projected Enrolment	SA2	Projected Enrolment

- Leichhardt can take in all Cairns areas between Gordonvale and Port Douglas SA2s without climbing the ranges and be just under quota and can allow for growth.
- Herbert can retake areas south of the Ross River and shed the Northern Beaches, Bohle Plains and Deeragun and be just under quota and can allow for growth.
- Dawson would be able to incorporate areas of the Burdekin Shire Council, Whitsunday Regional Council and the Mackay Regional Council without the Sarina SA2, but be at lower end of quota.
- Capricornia can be limited to Rockhampton, Gracemere, Capricorn Coast and most of the Gladstone Regional Council and be just on quota, with areas of the Gladstone Hinterland SA2 around Many Peaks to move to Flynn.
- Kennedy takes in rural areas from Cape York Peninsula down to Townsville, taking in coastal areas between Cairns and Townsville.
- Flynn becomes a seat based on the agricultural growing regions of the Burnett and Darling Downs (excluding those parts in existing Groom). This electorate would use the Burnett, New England and Bunya Highways as the main communication routes. Despite some similar communities of interests, the fact Groom breaks the flow of the seat adds logistical issues to the seat.
- Maranoa grows to become a roughly rectangular seat framed by the Flinders and Leichhardt Highways and taking in the remote areas between Rockhampton and Mackay. While this seat would be based primarily on mining and grazing, the inclusion of Sarina SA2 would be considered out of place. I did examine how this SA2 could be placed into Dawson, but the numbers in the north to remove the Burdekin and Ayr and place into either Kennedy or Maranoa just didn't fit.

Like those that have made suggestions about restricting some electorates to urban centres, Maranoa does grow to be unacceptably large in area and while some would argue that it works for Durack in Western Australia, that ignores the fact that a large portion of Durack is uninhabited while any expanded version of Maranoa contains many significant population centres dotted throughout the entire electorate and would make adequate representation difficult for the local member. As a result, I would feel that this would fail the community of interest criteria. So, while far from ideal, until Queensland grows enough to be entitled to a 31st seat, we are more or less stuck with the status quo. It does seem generally accepted that the easiest thing to fix boundaries in the north is to move Bentley Park into Kennedy.

I note that some contributors have also raised concerns with the Wright electorate and have attempted to find a solution to it. I find it curious that some of the more thorough suggestions do not change it at all, including the major political parties which indicated to me a lack of understanding of the geography of the area, or the political expediency associated with it. One contributor did try and widen the 'gap' linking the two parts of the current electorate, but in the end, it was only piecemeal. I would implore the committee to examine how this seat is orientated.

With regards to names, I see no reason to change any of the electorate names at this stage. I commend the suggestion of Mabo however, the suggestion of Bjelke-Petersen would be classed as inappropriate at this point in time. I would suggest that it certainly would be appropriate sometime in the future but at this point, memories of Sir Joh's government is still raw for many Queenslanders and the fact that Lady Flo Bjelke-Petersen, herself a former senator for Queensland, is still alive. It would be fitting that a seat called Bjelke-Petersen should be named after both Sir Joh and Lady Flo. Under AEC guidelines, the criteria to name a seat this is not currently met.

There are several contributors that have given good suggestions on how to redraw boundaries, some minimalist, some drastic. I hope mine would be considered a good balance of minimalist and out of the box thinking.

I wish you well with your deliberations.

Andrew Kamler
