Dear Sir/Madam,

How could anyone possibly service your new proposed electorate of Parkes – to quote someone else it is "Super-sized stupidity"!!

To service this elecorate one would need a helicopter to even visit his constituents once a year – imagine the costs of trying to drive, staying in motels, meals etc. and the inordinate amount of time involved – I thought a member was also expected to sit in parliament trying to represent us, that will be wishful thinking!.

They might be short on numbers compared to a block or two in Sydney, but surely common sense must prevail. It governments weren't so busy Centralising instead of Decentralising this may not be a problem. Even the seat of New England will be far too large as it already is – is this just another government ploy to reduce the voices of Country people.

Why don't you just close down country areas and hope China and Indonesia will be able to feed you all in the future? Like everybody else I am getting sick and tired of being governed by Public Servants who have to justify their existence by drawing lines on maps!!

Yours in anger,

Gail Moffatt
