Subject OBJECTION TO PROPOSED FEDERAL ELECTORAL  
REDISTRIBUTION

Classification  Unclassified

Dear Sir

As a resident of Gilgandra NSW & a registered voter in the Federal seat of Gwydir I hereby register my very strong objection to the current proposal involving the seats of Gwydir & Parkes.

This proposal if implemented would seriously & detrimentally impact on the level of representation of every resident & every community in the effected electorates. This poorly thought out proposal would present the elected member with the impossible task of effectively representing the interests of a geographically extremely large electorate with very diverse interests, certainly there is no community of interest.

This proposal appears to be designed to disenfranchise the voters of the existing electorates of Parkes & Gwydir & will certainly further marginalise regional & rural Australia. The result will certainly be the continued withdrawal of government services & a serious decline in private investment in this large area of country NSW.

I strongly urge the Commission to reconsider this proposed redistribution which will further impact on the economic development of a large area of rural Australia & on the way of life & standard of living of the residents of this region.
