 Subject redistribution of gwydir electrote

Classification Unclassified

to whom it may concern

this is to lodge my objection to the proposed boundry changes for the electrote of gwydir i dont belive putting the residents of gwydir in the seat is logical and realistic for starters parks and Moree are over 16 hours

a part making it impossible for the local member to be able to do electrol duties in 1 day and if he or she did they would need a charter plane at the exspence of the tax payer there is no commercial plane services between these

areas i would like to see moree added to the current seat of new england with a proposed name change to the seat of kamilori this would bring all the

towns together in the kamilori area of the former atsic boundries please dont

take away the bushs voice in canberra to parkes leave it in regional and rural nsw should you wish to disscuss this any further please reply to this e mail
