Dear Sirs

I am outraged that you are considering merging Guyra and Parkes.

I lived on the land all my life and know and understand how Country people are inconvenienced. For example the cost of fuel is a huge expense to farmers and helping reduce profits - to have access to a Local Member is of paramount importance - how could one man ever patrol the area that would be created? ^{Some} People on the land would have no access to their member at all, and would be lucky to have him ever in some out back areas.

It seems there is always progress in the city but little thought to the country roads, Trains, air services and medical centres

I hope this decision is never made - it would be a backward step in this State & Country
Yours faithfully Virginia Q Javel
