Sydney. 2000

Dear Sir,

Re Proposed loss of a Country Seat.

I would like to lodge my protest against the proposed redistribution and the loss of a country representative in Parliament.

Already experts are protesting the urban sprawl in Sydney and estimate the thousands of new homes proposed on the outskirts of the city will be trouble spots in the future as the residents will be without jobs and transport and mainly existing on the dole. It is emphasised that these homes will be built without the infrastructure necessary in any community.

We need as much country representation in Parliament as possible in order the influence people to leave the city and live in country towns, and to keep our young people in the country or have them return after their education is finished. A more equal distribution of the population of NSW would solve many of the problems pressing in upon Sydney.

Yours sincerely,

Elaine Druce.
