THE REDISTRIBUTION COMMITTEE
FOR N.S.W.

Dear Sirs

I protest most strongly at the proposed abolishment of the seat of GWYDIR. It is an unreal situation to expect any person to cover the area you have outlined .

If as we have been told it is based on population have you given any consideration to the fact that this area has been in drought for 5 years . People have not the money at present to employ people and they have drifted away from the area. Once again it seems as if it is discrimination against country people . Have we not suffered enough without taking away our representation to enable us to seek out our elected representative. If this proposal goes ahead we would be denied ready access to our member of parliament as no person is cable of covering the area proposed quickly . We do not all have access to internet to contact anyone in a hurry and lots of times we need to speak in person to our member.

Agriculture which would make up most of the proposed area puts billions of dollars into the economy and is sick of being kicked in the guts by city people.

Get in your car and see how long it takes you to get around the proposed new electorate
