Redistribution for the Northern Territory

Dear Committee Members,

I wish to make a brief submission to the Committee.

Based upon the criteria for the redistribution of boundaries and the elector projections provided by the Committee I would suggest that no change to the existing boundaries be made.

This redistribution has been necessitated by the passage of time (7 years) and the current boundaries and projections are within tolerance and with no change to the boundaries, the population in the two Divisions is projected to remain remarkably similar (757 difference). The only reasonable adjustment may be to use Taylors Road as a boundary between the two Divisions.

On balance I would propose that the boundaries remain the same until the next redistribution in 2015.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Martin Gordon". The signature is written in a cursive, somewhat stylized font.
