# Queensland Federal Redistribution 2017

Prepared by Mark Yore

# Introduction

Following the last redistribution it is important to acknowledge the work of the 2009 Committee and the way their work has held together. It is to their credit that the boundaries of the majority of the seats currently met the requirements of the Act.

The 2017 Committee has some high standards to follow.

## General principles

At the start of this redistribution I wish to lay out the guidelines behind my approach to the redistribution. This provides a touchstone for my constructions as well as making it easier, hopefully, to understand my reasoning.

1. Boundaries must respect physical limits to borders, namely:
  - a. Natural geographic boundaries – coastlines, rivers, mountain ranges, national parks
  - b. Existing physical boundaries – main roads, railway lines
  - c. Boundaries must not break SA1 boundaries, unless there is no other choice.
  - d. If existing administrative boundaries, such as Council or State boundaries, can be used then they should.
2. Boundaries must demarcate “community of interest”, and not unduly place areas together that do not share common interests. If the population can be contained within one seat then major urban areas should not be split.
3. Boundaries must minimise adverse effects on the greatest numbers of people. Sometimes this may mean that a small group of people may be more affected to avoid a much larger group of people becoming more affected.
4. Where possible, Federal seats should maintain as much of their existing boundary as is possible.
5. If two (or more) existing seats can be realigned on a common boundary then this should be the preferred method.

## Electorate names

The State Redistribution created a number of changes in seat names and process, leading to what could be called general and specific annoyance at the decisions made.

In the Federal sphere Queensland maintains its entitlement to 30 seats, with no seats being added or removed. There are no seats as proposed that entail a change of more than 50 percent to the existing population of an electorate.

I propose that the Commission leaves the names of the seats alone.

## Methodology

I looked at whether there could be an exchange of voters from one seat to an adjoining seat in order to provide a minimalist change. In many areas that was surprisingly easy to do.

However in regional and North Queensland I took a slightly more radical approach and decided to fix many of the problems with current seats where electorates based in one city also contained small amounts of another city. The goal was to provide unified urban areas. This required major changes to the two largest regional seats, Maranoa and Kennedy.

The net result of these changes has been to provide seats based on the entirety of Cairns, Townsville, Mackay, Rockhampton and Gladstone.

## Changes

I've calculated the effect the proposed changes would have on electors on a seat by seat basis. This is expressed as the percentage of electors who would remain in the same seat after the changes.

The average across Queensland is 94.89 percent, with a number of seats containing 100 percent of the same electors after the changes.

Significant lower percentages include Kennedy (73.5 percent), Blair (79.09 percent), Oxley (83.41 percent) and Dickson (86.68 percent).

Lower results may be due to forced changes because of demographic pressure or deliberate decisions in order to achieve a stated outcome.

| Electoral division | Number of electors (current) | Over/Under | Number of electors (projected) | Over/Under | Redistributed Number of electors (current) | Over/Under | Redistributed Number of electors (projected) | Over/Under | Elector maintenance | Elector maintenance percentage |        |
|--------------------|------------------------------|------------|--------------------------------|------------|--|------------|--|------------|---------------------|--------------------------------|--------|
| Blair              | 99,942                       | -3,261     | 107,316                        | -2,808     | 103,568                                    | 365        | 111,350                                      | 1,226      | 81,917              | 79.09%                         |        |
| Bonner             | 100,770                      | -2,433     | 107,808                        | -2,316     | 103,026                                    | -177       | 110,172                                      | 48         | 100,617             | 97.66%                         |        |

# Electorates

## Moncrieff

The electorate of Moncrieff is close enough to the required quota that it could have been left as is. However I decided to make a small adjustment to bring the projected quota for the seat closer to the required value and to make a small adjustment to McPherson.

### Added

|                     |                 |         |     |     |       |
|---------------------|-----------------|---------|-----|-----|-------|
| MCPHERSON           | Burleigh Waters | 3122626 | 563 | 595 | 5.68% |
| Additional<br>total |                 |         | 563 | 595 |       |

While there were a number of changes that could have been made I chose this moderately sized SA1 because of the minimal effect it would have on the general area.

## McPherson

Again, this electorate could have been left alone without any changes. However the opportunity to make a small adjustment that would benefit Moncrieff as well was an acceptable choice.

## Fadden

Fadden is significantly over quota and will continue to grow. Using the M1 as a natural boundary allows the transfer of a small block at Oxenford to be distributed it to the under-quota electorates of Forde and Wright.

This also limits any changes to Fadden to this small area on the boundary of the electorate.

## Forde

Forde adds a small section of Oxenford on the western side of the M1 near the junction with Wright. This brings the seat back into quota with minimal changes to the boundaries.

## Wright

Wright has two changes. The first is the small addition from Fadden at Oxenford required to bring it into quota.

The second is a technical switch that acts as an intermediary between Blair and Groom as these seats do not share a common boundary. Consequently part of Blair at Rosewood is added, and part of the Lockyer Valley – West is moved to Groom. These are minor but essential changes, and I have selected areas that can be moved with minimal impact.

## Rankin

I suggest that Rankin retain its existing boundaries. Rankin is under quota now but is expected to grow at a faster rate to finish over quota.

## Bowman

I suggest that Bowman retain its existing boundaries. Bowman is over quota now but is expected to grow at a slower rate to finish under quota.

## Griffith

Griffith is over quota and is growing at a slightly faster rate than the Queensland average. I suggest that the majority of the over quota amount could go directly into Bonner, with the leftover amount making a start on the very deep hole in Moreton.

I recommend that the area at Mount Gravatt, Carina Heights and a small section of Holland Park would be a suitable contribution to Bonner, providing an easy to reference boundary particularly in the Pine Mountain bushland region.

The section of Tarragindi adjoining the Freeway would be a suitable area to transfer to Moreton, minimising the risk of creating community of interest problems along the rest of the common border.

## Bonner

Bonner is able to pick up the entirety of its quota deficit from Griffith, making the transfer fairly painless. The area added shares many common features with the existing Bonner electorate.

You will also note that I have recommended that Moreton Island be transferred to Petrie. Currently the island is within the Federal electorate of Bonner, the State electorate of Redcliffe and the Brisbane City

Council ward of Deagon, none of which are contiguous. There is also no transport link within Bonner. I suggest that it would more appropriately share the area with the State seat of Redcliffe and the Federal electorate of Petrie.

While this is not ideal, it is a better fit than the current arrangement.

#### **Moreton**

Moreton is significantly under quota and is limited geographically as to where it can draw additional electors from. While it can pick up the remainder of the excess from Griffith, that is not enough to fill out the seat.

I have therefore moved into the Oxley electorate, also significantly under quota. The area around Seventeen Mile Rocks has a sufficiently different community of interest to the remainder of Oxley that I feel comfortable taking some of this area.

Ideally future redistributions will cut further into the Centenary suburbs, following the state seat of Mt Ommaney.

### Oxley

I would have preferred to create a seat based entirely upon the Ipswich area, but that would have required more drastic changes to the existing seats of Oxley and Blair.

With the loss of part of Sinnamon Park to Moreton I have moved the seat of Oxley further west, taking in many of the traditional Oxley suburbs.

I have also transferred the balance of the Springfield Lakes area to Blair. I believe that the growth in the Springfield area is such that there will eventually be a sufficient population for this area to create a Federal electorate of its own, distinct from Ipswich or Brisbane.

Oxley has a significant historical presence and a well-defined community of interest and at a future point should coalesce into its own Federal electorate.

## Petrie

Petrie is a difficult seat to make adjustments to, as it has water boundaries to the east and the Bruce Highway to the west. It also has a “pinch-point” to the north. Previous Electoral Commission hearings in 2009, and various State redistributions, have established the significant community of interest within the Brighton and Sandgate areas, further limiting boundary changes.

Petrie is also a Moreton Bay Council electorate which contains a significant amount of Brisbane City Council areas. With this in mind Petrie is perhaps one of the most difficult seats to adjust.

I have taken the Fitzgibbon area – the remainder of the Fitzgibbon-Taigum SA2 – and placed it in Lilley. This area shares common road access with Lilley and only provides road access along the Lilley-Petrie border. There is no access from within the Petrie electorate.

The Fitzgibbon and Taigum areas also share a significant community of interest, distinct from the remainder of the Brisbane City Council area within Petrie.

This is a relatively minor change which leaves the remainder of Petrie’s boundaries identical.

As previously mentioned with Bonner, I also suggest the inclusion of Moreton Island within Petrie to maintain consistency with the State electorate of Redcliffe. I believe that the residents of Moreton Island are ill-served by the ad-hoc assignment by different levels of government.

## Ryan

Ryan is constrained by the Brisbane River and Brisbane City Council boundaries, limiting the directions it can take. Ryan is over quota but this allows a transfer to the under-quota Dickson.

I suggest adjusting the boundaries at Keperra, which are similar to the “Hills District” of Dickson. This is a relatively small change and will directly assist Dickson.

### Brisbane

Brisbane is significantly over quota and projected growth will make it more difficult. Surrounded by over quota areas, the only transfer it can make is to the under-quota Dickson. Fortunately there is an easy boundary change that aligns with the over-quota Lilley to provide a consistent boundary.

I suggest the removal of a section of Enoggera and Alderley, together with a “bridging” section of Everton Park for Lilley. These remove a few sections of high-growth development from Brisbane, helping to ease future quota pressures.

### Lilley

Lilley has added a section of Petrie, increasing the amount required to come back within quota. I suggest transferring some of the area to the west to Dickson adjoining the area transferred from Brisbane and Ryan.

This covers the areas of Everton Park, McDowall, Stafford and Stafford Heights. The boundaries of Rode Road and Appleby Road are easy to identify and should minimise any confusion.

**Dickson**

Dickson is significantly under quota and adjoins seat that are significantly over quota. The logical choice is to put the over quota areas into Dickson. This does mean that Dickson will cross the border to add areas of Brisbane City Council, much like Petrie does.

Because of the size of the quota that needs to be adjusted, it also means that Dickson will lose area to the west to Blair such as Dayboro. I've taken the opportunity to add largely rural areas to match Blair's community of interest and keep the character of areas such as Samford township intact within Dickson

### Longman

Longman is slightly over quota and can lose some area in the west to Blair. I've suggested moving Woodford as it's a much better fit with the rural nature of Blair than the suburban character of Longman.

### Fisher

Fisher is under quota but can easily pick up areas from the adjoining over quota seat of Fairfax.

I suggest adding the three small SA1s of Mountain Creek bounded by the Sunshine Motorway, Nicklin Way and Kawana Way.

### Fairfax

Fairfax is over quota but can transfer part of its excess to Fisher and the remainder can be added to Blair in the Hinterland. This avoids major changes and keeps the majority of the existing boundaries intact.

## Blair

Blair runs up the back of the coast from Ipswich to the Sunshine Coast. Because it shares so many common borders with other electorates and has no singular community of interest it has been a great seat to act as a “bank” for other electorates – adding or taking away as needed.

Consequently the changes in Blair are significant. It does not have the opportunity to have a community of interest, but it does enable other electorates to build stronger communities. It shares the same purpose as the revised seat of Kennedy in North Queensland – it allows other electorates to become better electorates.

To summarise, Blair loses sections of Ipswich to Oxley and a small area of Rosewood to enable a transfer to take place between Wright and Groom.

It gains the remainder of Springfield Lakes, Kenilworth, Woodford, Cashmere and parts of the Samford Valley and Dayboro. It also tidies up some divided SA1s.

### Groom

Groom is slightly under quota. To bring it into quota a small part of the Lockyer Valley has been added to it. In general these SA1s are mountainous and match the existing profile of the Darling Downs.

## North Queensland

While I am reluctant to make major changes to seats without good reason I saw the opportunity to adjust the problems across North Queensland's coast seats.

Starting with Leichardt, I took the opportunity to recentre the existing electorates on the major coastal cities. This has meant some major shifts particularly for the seats of Maranoa and Kennedy, with their low population density.

### Leichardt

Leichardt has substantial growth and is significantly over quota. Because it is constrained by natural boundaries there are limited ways to adjust the seat.

Instead of pulling the southern boundary further north, I decided to fix the problem by creating a Cairns-based seat.

The proposed boundaries are Port Douglas to the north and Gordonvale to the south, extending inland to Kuranda. This is a significantly shrunken Leichardt, but the population change is not as large as the area change would suggest. The electorate contains 90,914 existing residents, gaining 13,070 and losing 18,999.

Importantly, it makes future adjustments much easier.

## Herbert

Herbert now becomes a wholly Townsville-based seat, gaining areas to the south of the city from Dawson.

Unfortunately the break at Innisfail-Tully-Ingham remains, but future population changes will allow adjustments to be made more easily between Leichardt and Herbert.

Another significant change is the return of Palm Island to Kennedy. While there is an argument about transport links between Palm Island and Townsville, the same argument could be made for a number of regions in North Queensland. Townsville is the largest city in the region, and as such draws from a much wider area. Palm Island is geographically closer to Ingham than Townsville, and I suggest that allowances should be made to provide electorate support for Palm Island, Ingham, and Tully.

#### Dawson

With the loss of Townsville South, there is an opportunity to reshape Dawson as a Mackay centred seat containing the Burdekin, the whole of the Whitsundays, and Nebo and the Pioneer Valley. Transport links with Collinsville and the mining areas are also great improved by moving from a Rockhampton-based electorate to Mackay.

## Capricornia

Capricornia becomes a Rockhampton based seat, adding the remainder of Rockhampton West from Flynn as well as Gracemere. Transferring some of the northern part of the electorate to Dawson and the Clermont area to Flynn also improves the structure of the electorate.

The electorate is not as close to quota as I would like. However it's still well within the allowance and the seat makes structural sense as it stands. There is no easy way to adjust Capricornia, as Flynn has the same difficulty.

## Flynn

Flynn transfers Rockhampton to Capricornia, exchanging it for Clermont to the west. This leaves it significantly under quota, and adding further territory west would risk making the seat unmanageable. I have resolved this issue by transferring the entirety of the Kingaroy region from the over quota Maranoa.

## Hinkler

Hinkler is under quota and projected to be significantly under quota over the life of the redistribution. However it is still well within the allowance.

I've made a small adjustment to transfer an area from the north of Wide Bay to Hinkler.

In a future redistribution with the advantage of an additional electorate some thought will have to be given on uniting Maryborough and Hervey Bay within the same seat.

### Addition

|                         |                      |         |            |            |       |
|-------------------------|----------------------|---------|------------|------------|-------|

## Wide Bay

Wide Bay sits almost exactly on quota but with low prospects for growth, which is symptomatic of Central Queensland. I've taken the opportunity to transfer an area to the north to Hinkler, but the remainder of the seat maintains the existing boundaries.

## Western Queensland

The seats of Kennedy and Maranoa have undergone extensive changes. In the case of Kennedy it was to accommodate the redrawn coastal electorates, and in the case of Maranoa it was to fill some of the gap left with the move of Kennedy to the north-east.

## Kennedy

Kennedy has undergone some large changes in area – but small population changes – as a requirement to realign the coastal seats. In particular it gains Far North Queensland, starting at Port Douglas and extending west to Weipa and Arukun and north to the tip of Australia in the Torres Strait.

It also loses Charters Towers to Maranoa, and some of the smaller communities such as Hughenden and Richmond.

Much of the Cairns hinterland at Kuranda is transferred to Leichardt, as is Gordonvale.

Kennedy gains the entirety of the Northern Beaches as well as regaining Palm Island, to go with the area it holds at Ingham. I do not believe the argument that Palm Island belongs in Herbert is valid, given the many closer communities such as Ingham that are part of Kennedy.

Some areas that are currently split, such as Kelso, the Bohle Plains and the Burdekin have been moved to where the majority of that area is.

In terms of impact on the seat, 76, 231 current Kennedy electors will remain in the new electorate of Kennedy.

## Maranoa

Maranoa gains territory from Kennedy along its northern border, adding Richmond, Hughenden and Charters Towers. It also gains the whole of Dalrymple from Kennedy. As it was sitting exactly on quota it is required to give up some existing area, and I've moved the Kingaroy area to Flynn to meet quota requirements for that seat.

In terms of impact on the seat, 93,419 electors in Maranoa have not changed seats.

## Endnote

Redistributions can be tricky, particularly when attempting to treat seven year forecasts as accurate.

I acknowledge that there are probably other approaches that may be taken by other contributors, and I acknowledge that I may change my mind in the objections phase if I see an idea that I think is better than mine.

Thank you for the opportunity to contribute.

Kind regards,

Mark Yore
