

**THE FEDERAL  
REDISTRIBUTION  
NEW SOUTH WALES**

# Objection 269

Nicholas Peppercorn

23 pages

Dear Redistribution Committee,

I would live to provide the following comments on the proposed redistribution. My comments concern the proposed boundaries for the inner-city electorates of **Wentworth, Kingsford-Smith, Sydney, Grayndler, Barton, Reid and Watson**.

I understand the need for inner-city electorates in Sydney to expand westward, due to most electorates in this region being significantly under-quota. I will deal with each of the inner-city electorates in turn, but my two main objections of the proposed boundaries are as follows:

1. The inclusion of Kyeemagh, Brighton-Le Sands and Monterey in the electorate of Kingsford Smith.
2. The inclusion of all of the suburbs of Enfield, Burwood Heights and Croydon Park in the electorate of Grayndler.

Amending these boundaries should not be a difficult task, but requires some boundary adjustments to surrounding electorates in order to ensure these electorates will remain within quota. I have attached in my Appendix at the end of this document, the proposed SAs I feel should be moved between electorates (based on the Proposed Redistribution changes).

### Wentworth

The electorate of Wentworth was one of the most under-quota seats in New South Wales. I support the AEC's proposed boundaries of Wentworth, with no amendments required.

### Kingsford-Smith

Losing part of Coogee and Clovelly to Kingsford-Smith means Kingsford-Smith needs to gain voters from a surrounding electorate. The proposed boundaries do not go for one of the more obvious choices: Sydney or Grayndler. Instead, the boundaries jump over Sydney Airport, and the Cooks River, and include a small slither of Botany Bay, including the suburbs of Kyeemagh, Brighton-Le Sands, Monterey and parts of Ramsgate

In my view, the proposed boundary for the electorate of Kingsford Smith is not appropriate. Sydney Airport is a large, clear geographic boundary between the suburbs in the Eastern Suburbs of Sydney, and the suburbs in the St George area. There is no community of interest between the suburbs of Mascot, and the suburbs in St George, except that both lie next to the airport. The suburbs in the St George region would find a more obvious community of interest in the St George based electorate of Barton, dealt with below.

A more obvious community of interest for Mascot lies in the southern suburbs of the seat of Sydney, including Roseberry (which already falls partly in Kingsford Smith), Beaconsfield and Zetland. These suburbs have no clear geographic boundary between them, and share a common history and built environment. These suburbs are part of the old industrial heartland of Sydney, that has recently been rezoned as medium to high-density apartments and townhouses. Though it could be argued that these suburbs fall within the City of Sydney, and

therefore are better placed in the electorate of Sydney, this argument falls flat when you consider that suburbs immediately to the east of the Sydney CBD, including Potts Point and Darlinghurst, which have more of an affinity to the City of Sydney, are now proposed to be in the electorate of Wentworth. In fact, until very recently (2004), these suburbs fell within the separate council of the City of South Sydney, and are closer geographically, and historically, to the suburbs of Mascot, Kensington, and Eastlakes in Kingsford Smith.

Therefore I suggest:

1. The SA1s of Monterey-Brighton-le-Sands – Kyeemagh and of Sans Souci-Ramsgate that are proposed to be moved into Kingsford Smith from Barton and Cook, be moved into the electorate of Barton. This is the natural home for these suburbs, as their major centres are in Rockdale and Kogarah, which fall within the proposed boundaries of Barton.
2. All of the SA1s of Zetland and Roseberry-Beaconsfield from Sydney, as well as one industrial SA1 from Erskineville-Alexandria from Sydney are to be added to Kingsford Smith. Therefore, Kingsford Smith's new northern boundary would run along Bourke Road (Alexandria), onto Bourke Street (Zetland), and down O'Dea Avenue (Zetland). Therefore, all of the suburbs of Roseberry, Beaconsfield and Zetland would be in one electorate, with all of the future town centre of Green Square in the proposed electorate of Kingsford Smith.

In terms of losses and gains of electors, the proposed Kingsford Smith would:

- Lose 11,415 (13,076) voters to Barton as of 2023 (2028) enrolment.
- Gain 12,213 (13,316) voters from Sydney as of 2023 (2028) enrolment.

Therefore Kingsford Smith would fall within quota with:

- 119,011 electors in 2023.
- 125,502 projected electors in 2028.

## Sydney

Sydney losing 12,213 voters in Zetland, Rosebery-Beaconsfield and Erskineville-Alexandria to Kingsford-Smith brings the electorate back under quota with:

- 117,883 enrolled voters in 2023.
- 115,158 projected enrolled voters in 2028.

The only electorate Sydney can gain more electors from is Grayndler to the west. The proposed Sydney gains the Balmain peninsula from Grayndler, which I support. Therefore, it makes sense for Sydney to gain more electors from the old Leichhardt Council, which

included the Balmain peninsula, along with Annandale and Leichhardt. Moving the suburb of Annandale into Sydney brings the number of enrollers to:

- 124,824 enrolled voters in 2023.
- 122167 projected enrolled voters in 2028.

The projected enrolment falls below the 125,085 permissible minimum number of electors. Therefore, Sydney will need to gain more electors from Leichhardt and Lilyfield. I have opted to move all SA1s east of Balmain Road from Grayndler into Sydney. Balmain Road is a major road used to travel from Parramatta Road through to the Balmain Peninsula, and therefore forms a neat boundary. Though Leichhardt is now split between Sydney and Grayndler, this boundary unites all of Lilyfield into Sydney, and also does not cut through the heart of Leichhardt's community at Norton Street. With this amended boundary, the new Sydney falls comfortably within quota with:

- 129,349 enrolled voters in 2023.
- 126,630 projected enrolled voters in 2028.

Concerns about the electorate of Sydney's projected decline in enrollers should be allayed by the fact that population projections for many parts of Sydney were calculated during the Covid period, when populations in many inner-city locations decreased. The proposed electorate of Sydney includes many high-growth areas, with significant developments, and I suspect the number of enrolled voters is likely to increase, not decline, by 2028.

## Grayndler

Losing Annandale and parts of Leichhardt and Lilyfield, brings Grayndler back under quota with:

- 111,767 enrolled voters in 2023.
- 114,969 projected enrolled voters in 2028.

I also object to including all of Croydon Park, Enfield and Burwood Heights in Grayndler. These suburbs have little connection to the rest of the Inner West Council suburbs, being largely located in Burwood Council, and relying on Burwood and Strathfield as a major centre for shopping and community organisations. I will deal with my amendments to amending these western boundaries below.

If Grayndler is to remain with quota, it will need to gain a number of voters from somewhere. I think the best option would be for Grayndler to absorb all of the suburb of Canterbury from Watson and Barton, and to gain all of Earlwood from Barton. I understand the AEC's decision to keep the Cooks River as a hard boundary, but as an inner west local, I would say this boundary is artificial, and in fact the Cooks River has become a meeting place for the suburbs that surround it. In fact, many sporting fields and clubs exist along the Cooks River and cater to both the local Marrickville and Earlwood communities. Further, Earlwood shares a much stronger community of interest with Marrickville, than with the rest of Barton. I would argue that Wollie Creek forms a stronger boundary between the Inner West and St George region, than the Cooks River does. Both Earlwood and Marrickville have a very strong Greek

heritage, and many Greek locals in Earlwood in fact do their shopping at the many Greek delicatessens in Marrickville. Bringing the suburb of Canterbury south of the Cooks River into Grayndler, unites the suburb into one electorate. A small part of Campsie south of Canterbury Road and east of Bexley Road is also added to Grayndler in my proposal to make for a stronger geographic boundary. Including these two suburbs takes Grayndler well within quota.

With this surplus of voters, I propose to make amendments to the western end of Grayndler, so the electorate, and the neighbouring electorate of Reid, align better with community interests. In my proposal, Grayndler would keep all of Ashbury, all of Ashfield (gaining the remaining parts of Ashfield from Reid), and a small part of Croydon Park, whilst the rest of Croydon Park and Enfield would move to Reid. The boundary for Croydon Park would run along Croydon Avenue south of Georges River Road, and along Greenhills Street (through Croydon Park and Croydon) between Georges River Road and Liverpool Road, which also forms the boundary of the Inner West Council. North of Liverpool Road, I propose the boundary follow the boundary of the suburb of Croydon, therefore uniting the remaining parts of Inner West Council into Grayndler, as well as ensuring the centre of Croydon is not split between two electorates. One small part of the suburb of Croydon remains in Reid, south of Liverpool Road. Uniting this part of Croydon within the same electorate as Haberfield means two of the early Federation suburbs in Sydney are united in one seat. This brings Grayndler within quota with:

- 125,352 enrolled voters in 2023.
- 129,433 projected enrolled voters in 2028.

These boundaries are much stronger than those proposed, uniting the Inner West Council into two seats (Grayndler and Sydney), and creating an electorate that reflects the reality of the Cooks River as a place where these inner south western suburbs of Sydney come together, rather than as a boundary.

## Reid

The boundary re-adjustment between Reid and Grayndler can be summarised as follows:

- The rest of Ashfield, and most of Croydon is moved into Grayndler from the proposed Reid.
- In exchange, all of Enfield and Burwood Heights, and most of Croydon Park is moved into Reid from the proposed Grayndler.

These changes keep Reid within quota with:

- 120,002 enrolled voters in 2023.
- 129,959 projected enrolled voters in 2028.

Therefore, I suggest no further changes to the electorate of Reid.

## Watson

The electorate of Watson loses a small number of voters to Grayndler. Though this lowers the number of voters, Watson would remain within quota with:

- 113,634 enrolled voters in 2023.
- 127,625 projected enrolled voters in 2028.

Therefore, I suggest no further changes to the electorate of Watson.

## Barton

A summary of the changes above to Barton include:

- Earlwood, Canterbury and a small part of Campsie moved into Grayndler from the proposed Barton.
- Monterey-Brighton-le-Sands – Kyeemagh and of Sans Souci-Ramsgate moved into Barton from the proposed Kingsford-Smith.

These changes keep Barton within quota with:

- 114,916 enrolled voters in 2023.
- 125,723 projected enrolled voters in 2028.

Though I think these boundaries are suitable, if the AEC is hoping to improve the boundaries further, they may consider that the southern boundary be moved south to align all the way along King Georges Road down to Terry Street. This would potentially balance voters between Barton and Banks more equally, and align Hurstville within Barton. However, it is not necessary, because the electorates are within quota without this change.

Thank you for considering the above suggestions. Please see detailed SA1 level amendments to the proposed boundaries below.

Nicholas Peppercorn

## Appendix A: SA1s to be moved that differ from the proposed boundaries

### Kingsford-Smith

Loses following to Barton:

SA1 code	AEC Proposed electorate	Current electorate	SA2 Name	Actual enrolment 9/8/2023	Projected enrolment 10/4/2028
