AEC Boundary Changes

I support the changes by the AEC to all the boundary changes throughout the state. Whether it be in Sydney or out in the regions, the changes were made with considerable thought, and demographics and geographical locations and history were all taken into consideration. I ask the AEC however to reconsider the axing of the North Sydney seat and instead opt to scrap the name Warringah. The boundary changes itself are fine and don't need altering, but just the federation name to be retained and the insignificant name of Warringah to instead face the chopping block.
