Whilst I understand the need to redistribute some electorates and the review of names, I strongly object to replacing Franklin with an overtly aboriginal name, or with a white name.

For goodness sake, in the interest of reducing further division in our country, can we please pick a neutral name that represents nature or something neutrally specific to the area.

So we replace a white ancestry name for an aboriginal ancestry name, now who is being discriminated against!

I am sick to death of this woke rubbish. Enough is enough!!
