SUGGESTIONS ON THE 2026 FEDERAL ELECTORAL REDISTRIBUTION OF QUEENSLAND

The Queensland Greens thanks the Electoral Redistribution Commission for this opportunity to contribute to the future of Australia's electoral boundaries in Queensland.

We have modelled changes to district boundaries and have **attached** map shapefiles for our proposed boundaries in these areas.

Where possible, our proposals focus on uniting communities of common interest that have been divided over previous redistributions, while respecting the above recommendation to reduce elector movement.

Kind regards

Gemmia Burden

Convenor
The Queensland Greens

Name changes

As our recommendations aim to reduce overall changes to electoral boundaries where possible, we recommend that electorate names remain as they currently are to reduce confusion to electors.

Boundary changes

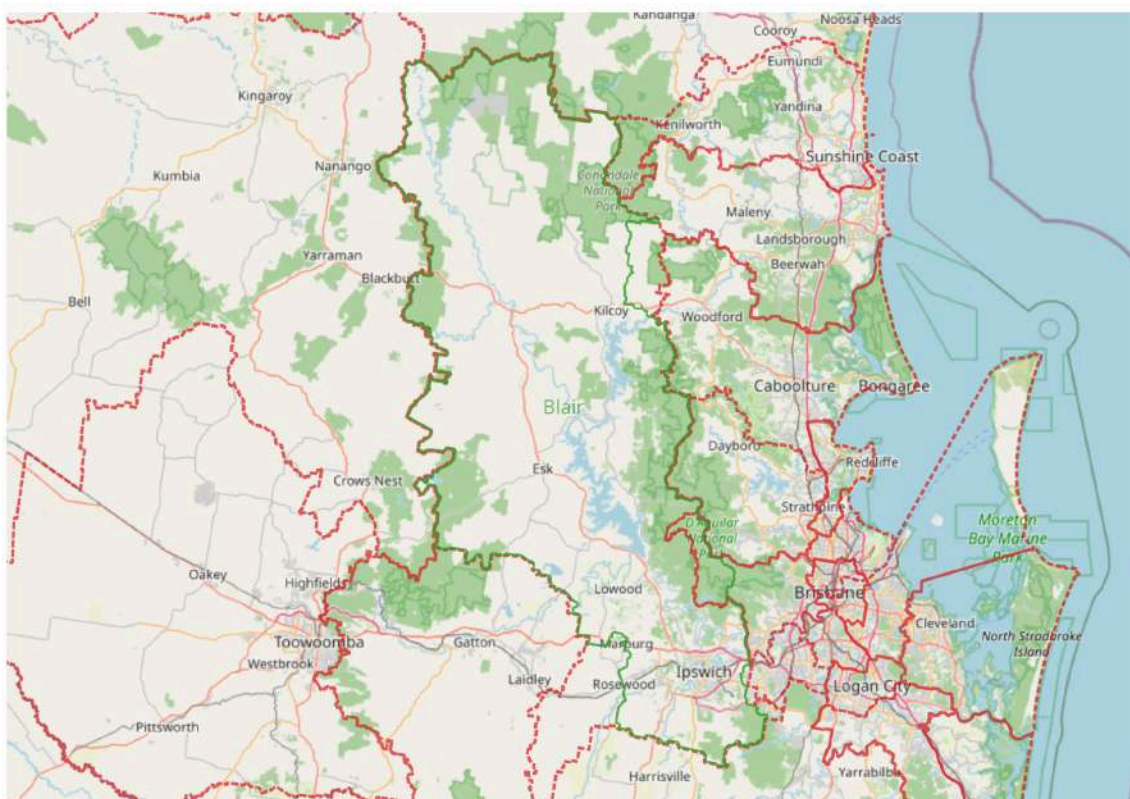

We have modelled broader boundary changes in our **attached** map shape files, most of which are consequential from either these changes below or the new seats above.

In the maps below, existing boundaries are in red and our proposed boundaries are in green.

Our draft maps follow SA1 boundaries however, there are instances where breaking SA1s to follow more natural boundaries like main roads, waterways or parks would be more sensible. We recommend the Commission prioritise natural boundaries over those in the Australian Statistical Geography Standard, as the values provided have changed with the recent 2026 Census and the introduction of ASGS Edition 4.

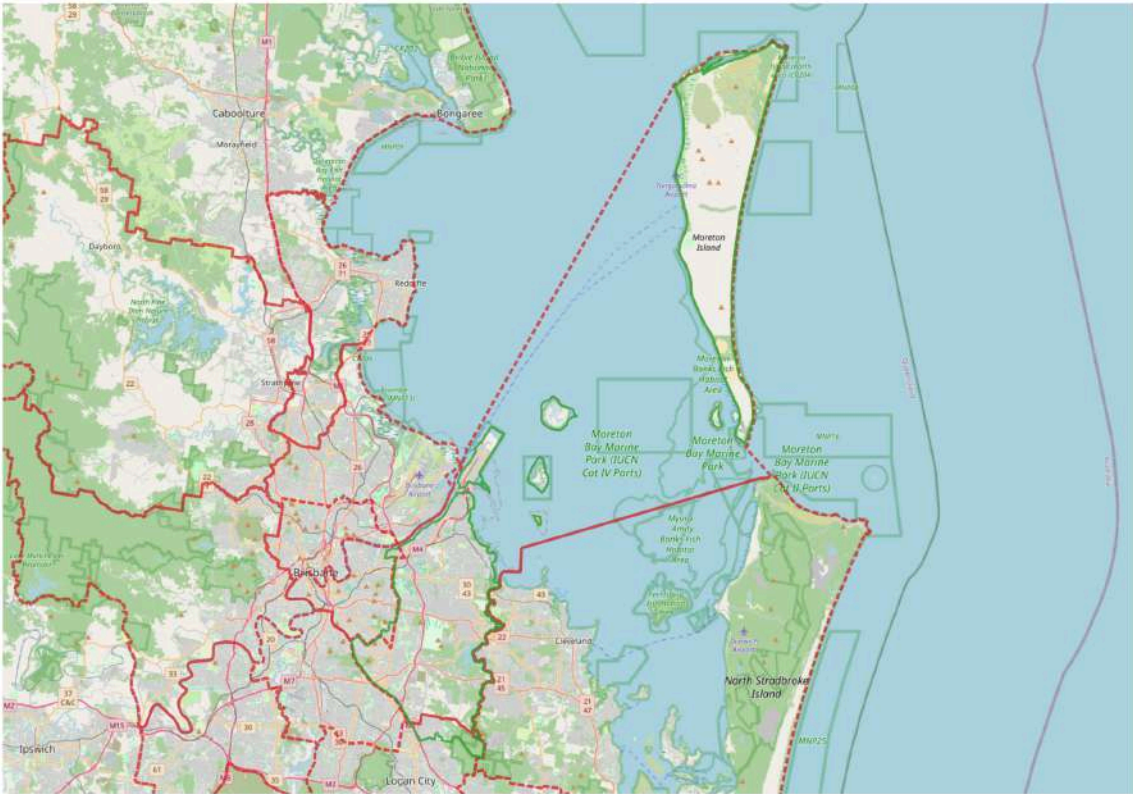

As mentioned before, our focus here was on preserving or reforging genuine communities of interest centred on major activity centres or transport corridors, bounded where possible by hard geographic boundaries.

Blair

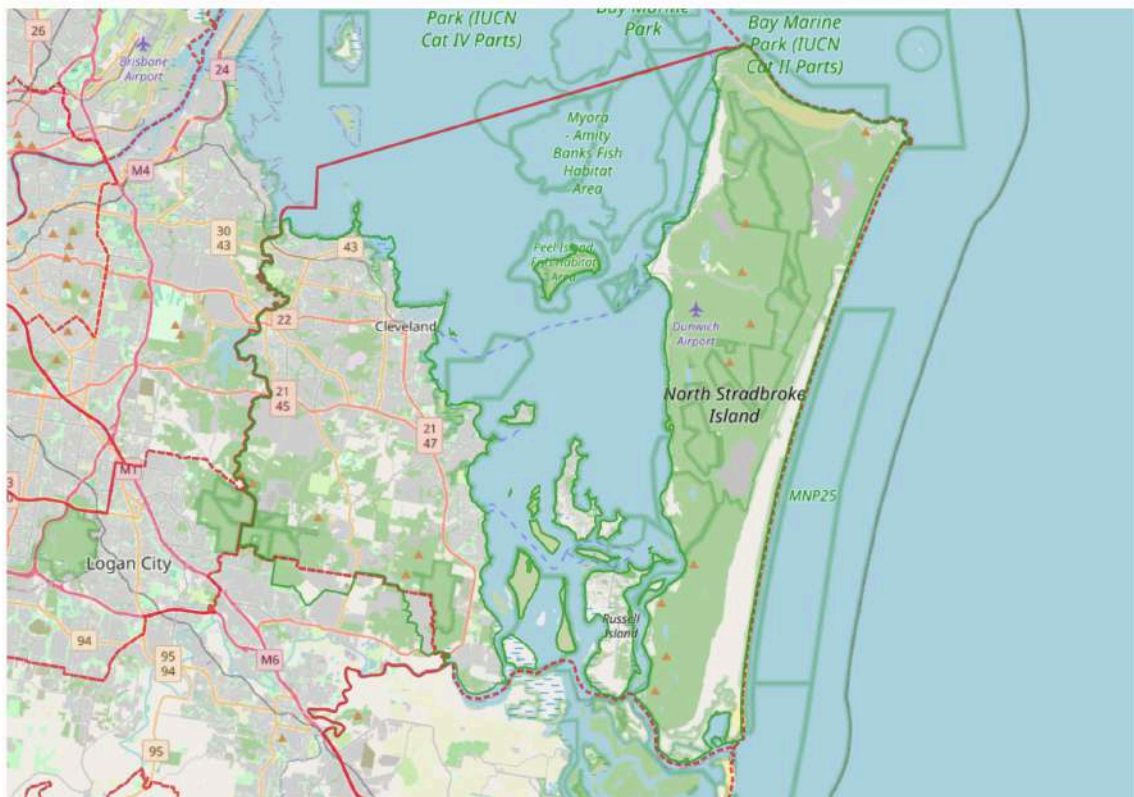

Loses	Sandy Creek community to Longman . Grandchester, Lanfield, and Tallegalla east Rosewood Warrill View Road and north to the Warrego Highway move to Wright . The remainder of Collingwood Park, Redbank Plains east of School Road and Springfield Central are transferred to Oxley .
	No Gains.
Gains	Blair is projected to be significantly over quota. Reuniting the White Rock-Spring Mountain growth area by adding Springfield Central to Oxley helps keep a rapidly growing community connected.
	The western section of Collingwood Park was previously isolated and can now be reconnected. School Road acts as the best natural boundary for Oxley to take some of Redbank Plains. Grandchester, Lanfield, and Tallegalla are proposed to be added to Wright to support greater contiguity of smaller communities, and between Scenic Rim and Lockyer Valley population centres.
Rationale	The section of D'aguiar National Park currently in Ryan has been added to Blair to follow the current ridge line, however, the community that most interacts with this area is Mt Nebo in Dickson . We propose moving it into either of these electorates.

Bonner

Loses	No Losses.
Gains	Communities east and south of Whites Hill Reserve from Griffith . Rochdale South north of Springwood Road and Priest Gully from Rankin .
Rationale	<p>The communities on the outside of White Hill Reserve are disconnected from the rest of Griffith and share more connections with the Mt Gravatt/Mansfield communities and hubs over the road, falling within the Mount Gravatt East State School catchment outside of Griffith.</p> <p>The movement of Rochdale South is proposed as a block to retain the connected community of interest within the suburb. The strong natural boundary of Springwood Rd supports retaining the contiguous community.</p>

Bowman

Loses

No Losses.

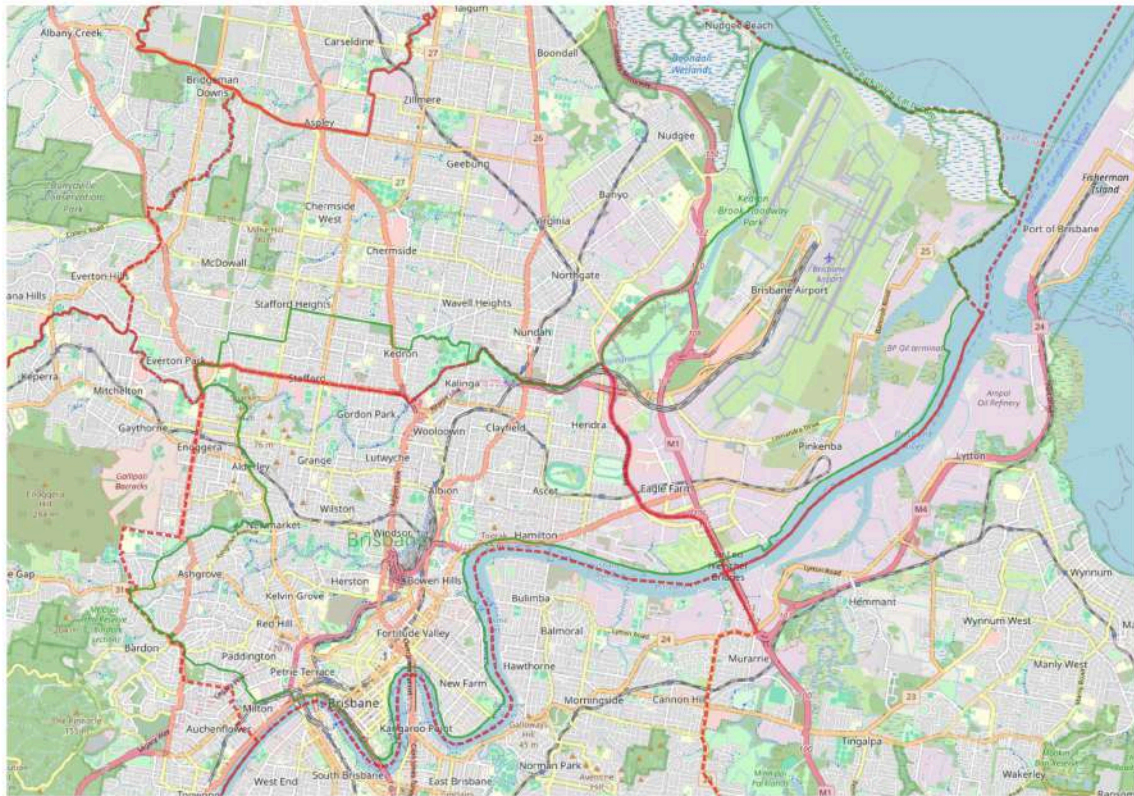

Gains

Mt Cotton north of California Creek Road and Wudur Road, Carbrook north of Beenleigh Redland Bay Rd from **Forde**.

Rationale

Bowman is largely stable population-wise; our focus has been connecting more of the Mt Cotton community which is currently divided by the artificial local government boundary.

Brisbane

Loses

Milton south of Milton Rd and east of Baroona Rd, Paddington East of Feinberg Rd and Empress Tce, Ashgrove north of Giraween Grv and Acacia Dr, and the remainder of Enoggera north of Enoggera Creek and west of Enoggera Rd to **Ryan**.

Gains

From **Lilley**; Stafford west of the road reserve (Leach St) and south of Redwood St, Stafford Heights and Kedron east of Abbley Rd and south of Wilgarning St to Gympie Rd, remainder of Kedron south of Edinburgh Castle Road Park, remainder of Eaglefarm, Pinkenba, and Airport.

Rationale

Brisbane is expected to grow steadily while not at the same pace as other parts of Queensland. Moving north reunites parts of Stafford, Stafford Heights and Kedron currently split by the existing boundary and isolated from the rest of Brisbane by Kedron Brook. Stafford Road hosts many of the shared community facilities and commercial centres. The proposed boundary is a more even share of local school districts between electorates, while preventing a panhandle of communities in **Lilley**.

Capricornia

Loses

Ooralea, Mt Coolon, and Collinsville to **Dawson**.

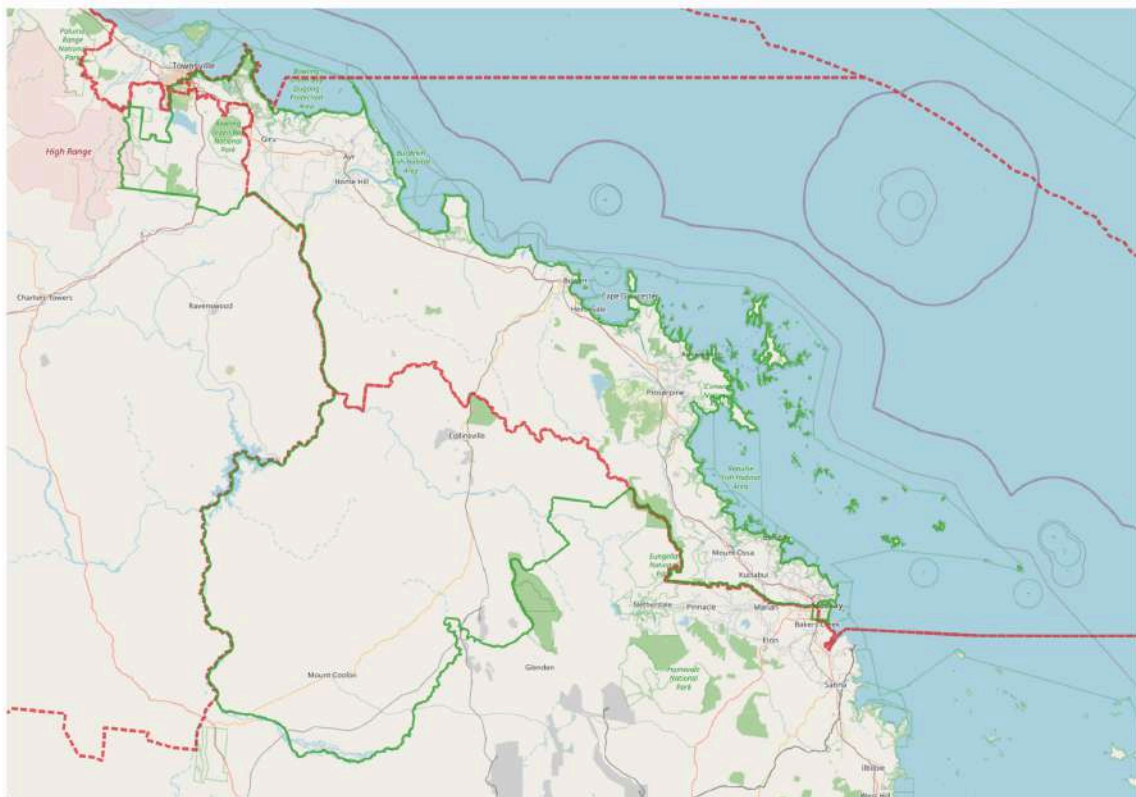

Gains

Alton Downs, Gracemere and Stanwell from **Flynn**.

Rationale

Our focus for **Capricornia** has been rejoining communities of common interest. Mt Coolon and Collinsville going to **Dawson** help to restore connection with their Local Government in the Whitsundays. Ooralea was separated from its neighbouring communities over the road and likewise returned to **Dawson**. Alton Downs, Graceme and Stanwell are part of Rockhampton Regional Council, and local services are located in Rockhampton City, returning to **Capricornia** helps reunite these communities.

Dawson

Loses

Ooralea, Mt Coolon, and Collinsville to **Dawson**.

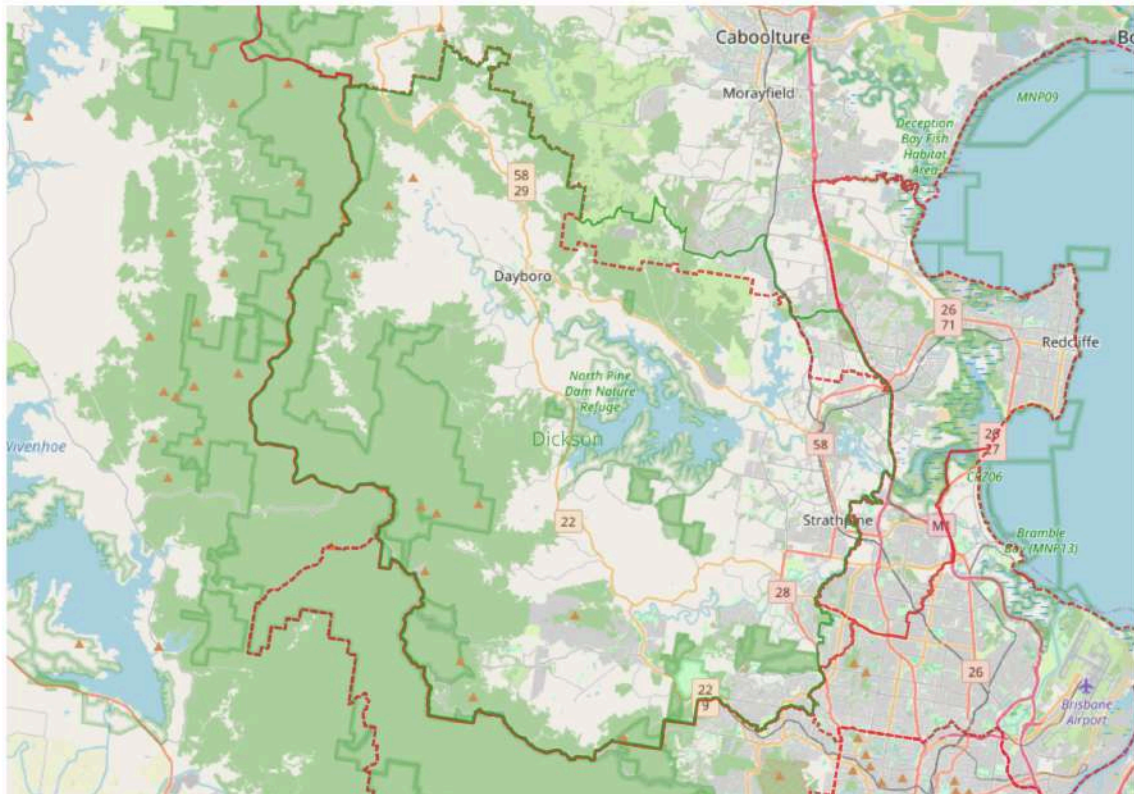

Gains

Ooralea, Mt Coolon, and Collinsville to **Dawson**. Parts of Douglas south and east of The Ring Road from **Herbert**. Communities north of Reid River (Mt Elliot, Ross River, Oak Valley, Woodstock and Majors Creek) from **Kennedy**.

Rationale

Mt Coolon and Collinsville moving to **Dawson** help to restore connection with their Local Government in the Whitsundays. Ooralea was separated from its neighbouring communities over the road and likewise returned to **Dawson**. Regional communities and outer suburbs of Townsville previously were represented by **Kennedy**; this move restores communities of interest that use Townsville as a major service hub.

Dickson

Loses

Remainder of Brideman Downs in Brisbane LGA to **Lilley**.

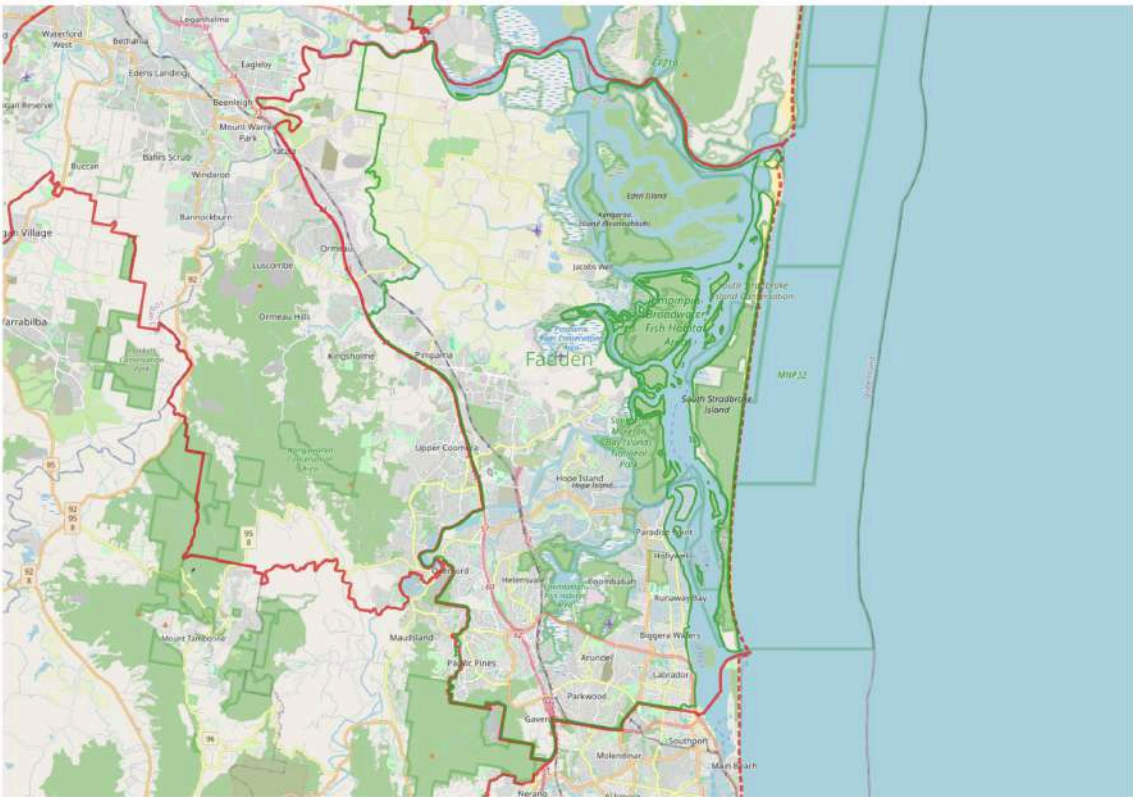

Gains

Dakabin south of Boundary Rd, Narangba south of New Settlement Rd and Raynbird Rd from **Longman**.

Rationale

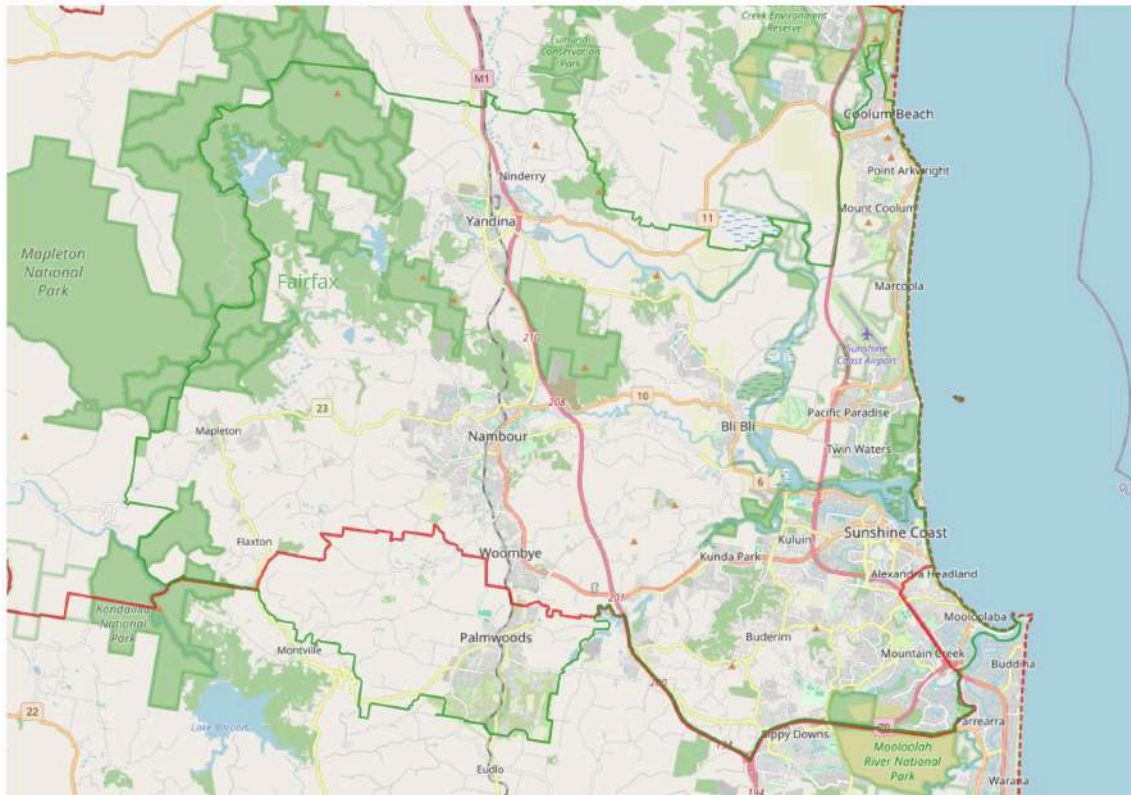

Dakabin currently sits isolated from neighbouring communities, North Lakes, by the major barrier of the M1, but does have connections south with Kallangur in Dickson. **Longman** is experiencing significant growth, our proposal reorientates Longman around the Caboolture region. Narangba has multiple connections south with **Dickson** and provides an opportunity for population movement with minimal disconnection. The communities east of Burrbengary Rd are smaller, and **Dickson** would still need to take some of Narangba but would have to do so without following some of the natural boundaries of the community.

Fadden

Loses	Stapylton and Ormeau to Forde . Northern tip of South Port to Moncrieff .
Gains	No Gains.
Rationale	Stapylton and Ormeau are communities connected along the M1 and have stronger connections and experience with the neighbouring communities like Yatala in Forde, than the coastal communities in Labrador.

Fairfax

Losses

Northern communities along Eumundi Kenilworth Rd, such as Kenilworth, Belli Park, Eumundi and Doonan, are moved to **Wide Bay**, along with Obi Obi in the west and Peregrine Springs.

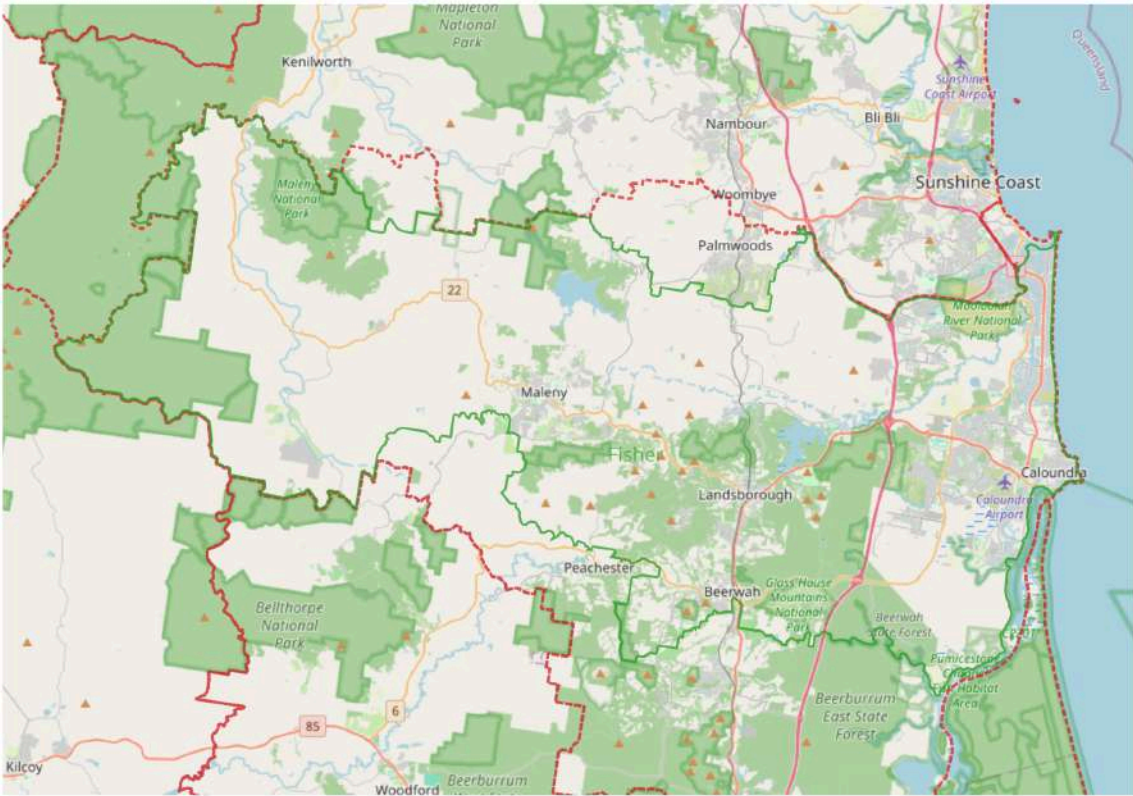

Gains

Alexandra Headland and Mooloolaba on the coast and West Woombye and Palmwoods in the south from **Fisher**.

Rationale

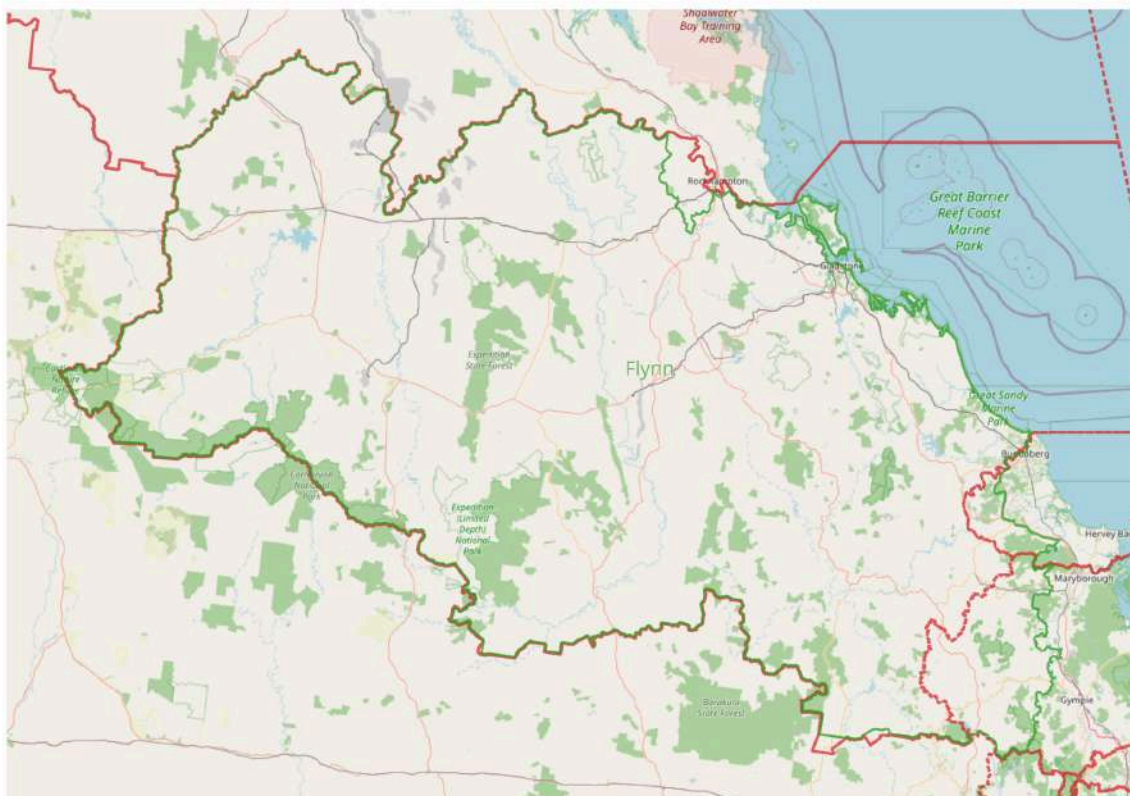

Population distributions mean **Wide Bay** needs to move south; this proposal helps to ensure the western communities remain connected, with the clear community along Eumundi Kenilworth Rd. West Woombye was previously disconnected from **Fisher** except by small back roads, adding it and Palmwoods helps to reconnect communities with the Major Centre of Nambour. Alexandra Headland and Mooloolaba were likewise physically disconnected from the rest of **Fisher** by the natural boundary of the Mooloolah River.

Fisher

Loses	Alexandra Headland and Mooloolaba on the coast and West Woombye and Palmwoods in the north to Fairfax . Wootha, Peachester, and Beerburum and Glass House Mountains north to Coochin Creek move to Longman .
Gains	Alexandra Headland and Mooloolaba on the coast and West Woombye and Palmwoods in the south from Fisher .
Rationale	Fisher is predicted to experience significant growth, these proposed changes seek to move communities following natural boundaries while attempting to maintain local connections with each other.

Flynn

Loses

Alton Downs, Gracemere and Stanwell to **Capricornia**. Parts of Durong and Duffield south of Chinchilla Wondai Rd to **Maranoa**.

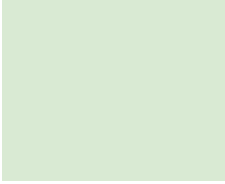

Gains

From **Hinkler**; Bundaberg North, and regional communities to the south of the Burnett River to South Bingera, and the communities of Apple Tree Creek and Childers. South Isis and parts of Cherwell and south of the Bruce Highway to the Burrum River. From **Wide Bay**; the South Burnett hinterland communities, including Aramara, Kilkivan, Goomeri and the remainder of the South Burnett Local Government Area.

Rationale

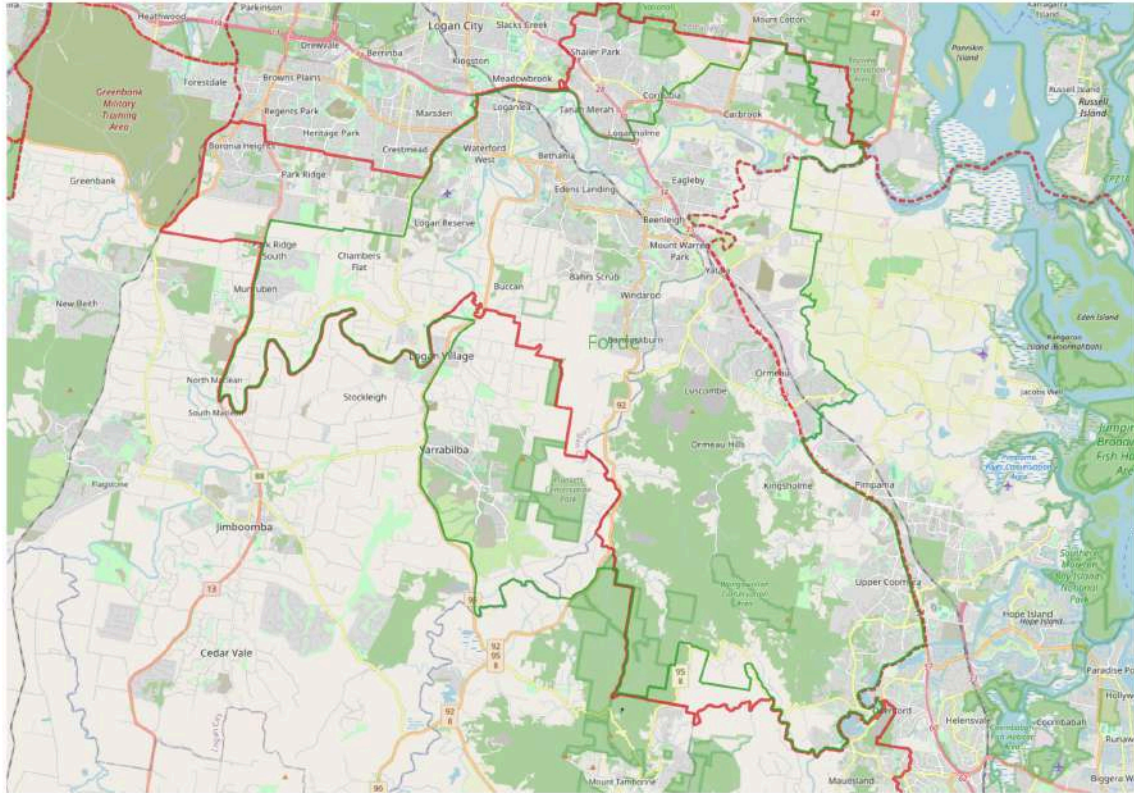

Flynn is experiencing significant population pressure as it fails to keep up with growth in other areas. Our recommendations include reuniting the Bundaberg communities to the north of the Burnett, where previously Gooburrum and Bundaberg North were separated. Southern Bundaberg region communities to the Burrum River, including Childer are proposed to be moved together to retain communities of common interest. This is proposed instead of splitting regional electors from those in towns and urban areas that act as their primary community centres. (See Gooburrum and Bundaberg North).

The South Burnett and hinterland regions are proposed to be joined together, as the region is deeply interconnected, particularly for the First Nations community living in and around the Cherbourg community.

If the Commission was considering the abolition of an electorate in this redistribution, then Flynn appears to be the most suitable candidate and would allow significant realignment.

Forde

Loses

Boronia Heights, Park Ridge, Shailer Park and Tanah Merah to **Rankin**. Parts of Carbrook to **Bowman**.

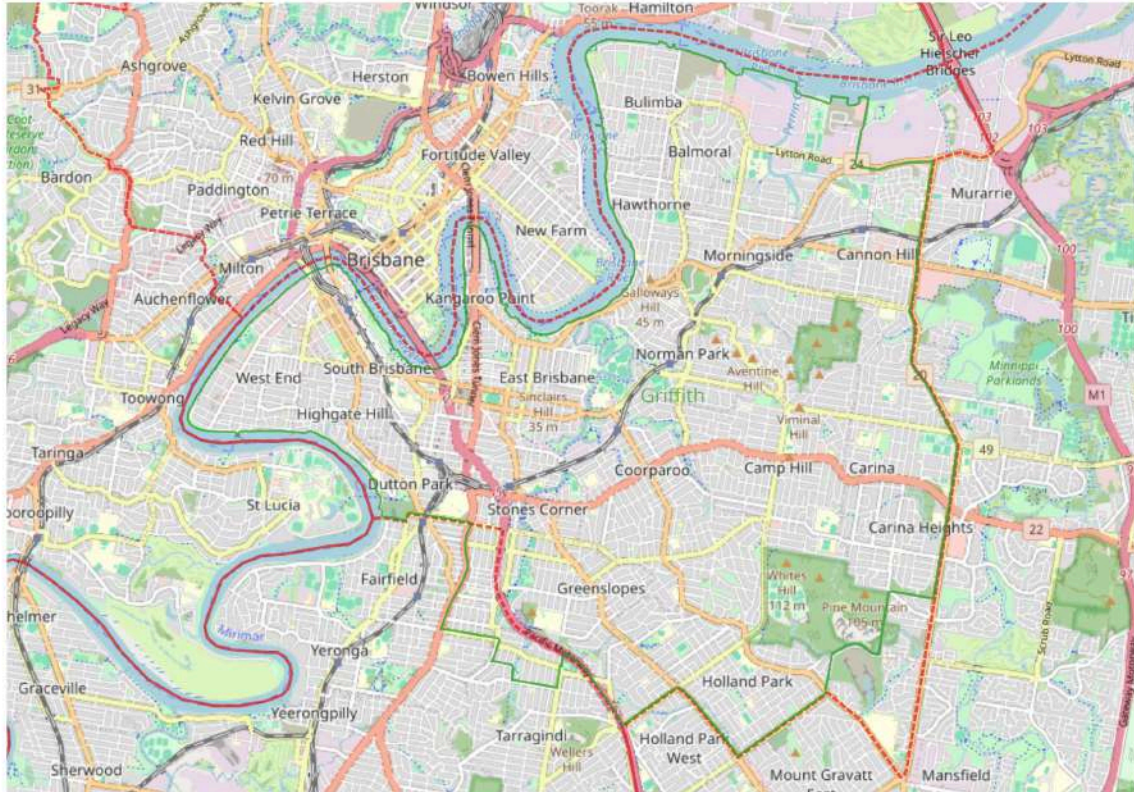

Gains

Yarabilba and electors east of Waterford Tamborine Rd from **Wright**. Stapylton and Ormeau to **Forde**.

Rationale

Forde has been moved to consolidate around the distinct communities in Yarrabilba and part of Logan Village. Significant growth is expected in southern Logan, and supports ongoing community connection. The northern Gold Coast communities along the M1, Yatala, Stapylton and Ormeau, have similarly been joined as a distinct part of the region.

Griffith

Loses

Communities to the west and south of Whites Hill Reserve moved to **Bonner**.

Gains

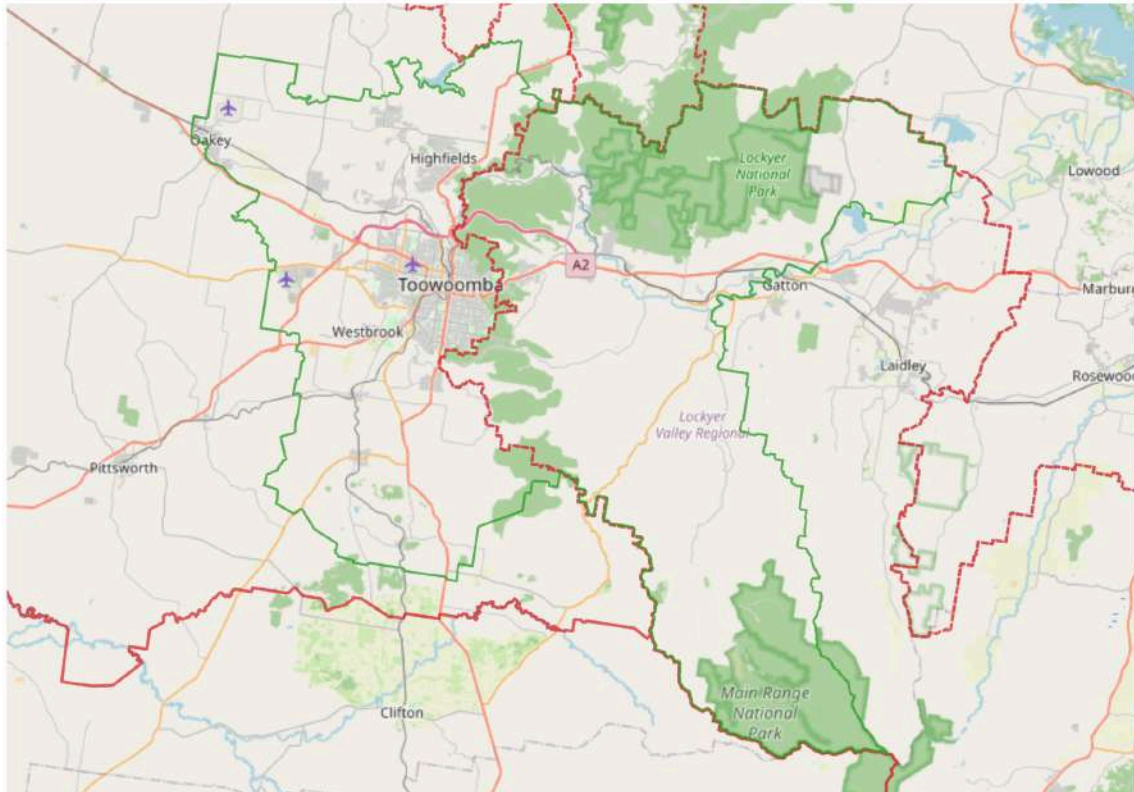

The parts of Annerley, Ekibin, and Wellers Hill communities east of Ipswich Rd and north of Waterton, Sexton and Esher St gained from **Moreton**

Rationale

The communities on the outside of White Hill Reserve are disconnected from the rest of Griffith and share more connections with the Mt Gravatt/Mansfield communities over the road, falling within the Mount Gravatt East State School catchment outside of Griffith.

We propose reconnecting Buranda, currently part of Griffith, with the parts of Annerley, Ekibin and Wellers Hill. These communities are strongly connected to each other and to the rest of Griffith; Ipswich Rd is a primary corridor for southern Brisbane, and Lewisham St and Esher St provide primary east- and west-bound connections to Greenslopes and Holland Park. The PA and Greenslopes Private Hospitals' primary employers in the area. With commercial centres in Buranda, Stones Corner and along Ipswich Rd are shared across the communities. Local school catchments are likewise shared across these suburbs and into Greenslopes this shift brings a more even portion into Griffith which otherwise left the community separated in Greenslopes.

Groom

Loses

Outer Toowoomba regional areas to **Maranoa**, such as Biddeston, Goombungee, Hirstglen, Pittsworth, Southbrook

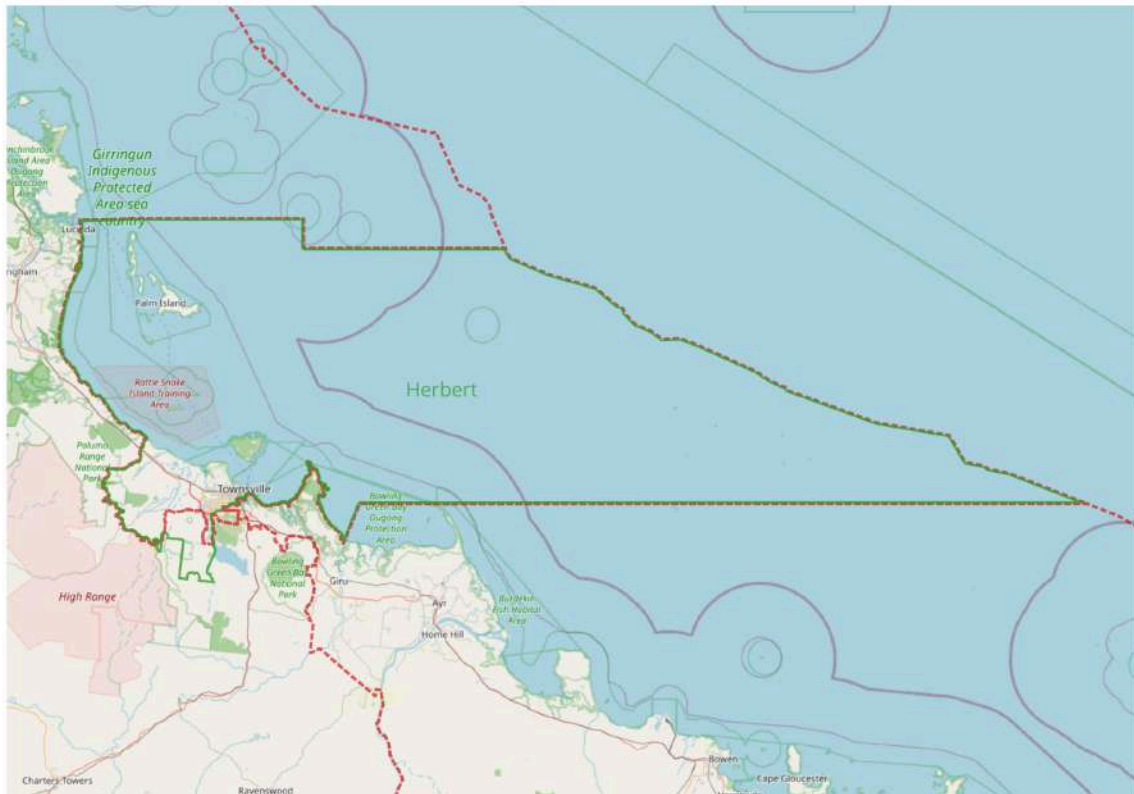

Gains

Lockyer Valley areas north of Lockyer Creek, and Tenthill Creek district along Mt Sylvia Rd from **Wright**.

Rationale

Significant pressure on **Maranoa** for elector growth means large sections of outer Toowoomba region have been moved out of **Groom**. We have proposed the western region of Lockyer Valley be moved into Groom. While these are distinct communities, there is a strong interconnection; Toowoomba acts as the primary services hub for South Western Queensland. This proposal avoids the alternative of **Maranoa** moving into yet another region (such as Somerset or Scenic Rim), further dividing other communities.

Herbert

Loses

Parts of Douglas south and East of The Ring Road to **Dawson**.

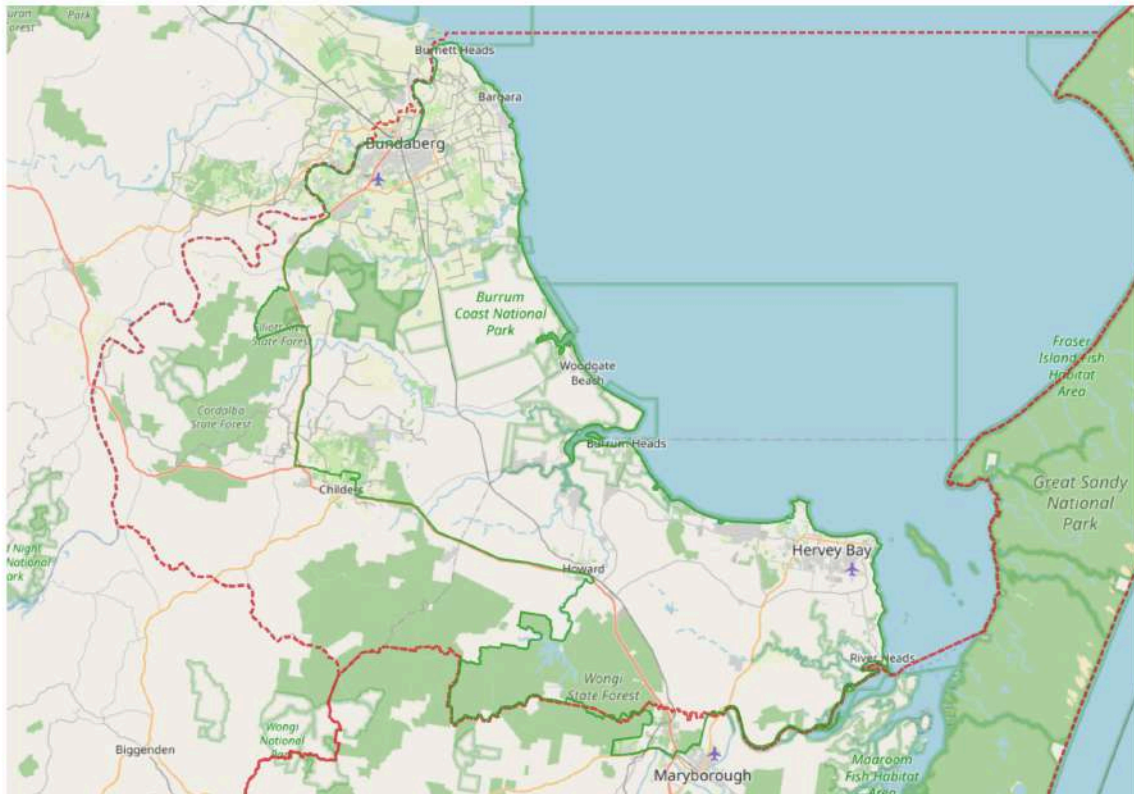

Gains

Alice River and Gumlow from **Kennedy**.

Rationale

Reuniting regional communities in the Townsville region with their primary service centre in Townsville City.

Hinkler

Loses

Bundaberg North, and regional communities to the south of the Burnett River to South Bingera, and the communities of Apple Tree Creek and Childers. South Isis and parts of Cherwell and south of the Bruce Highway to the Burrum River to Flynn.

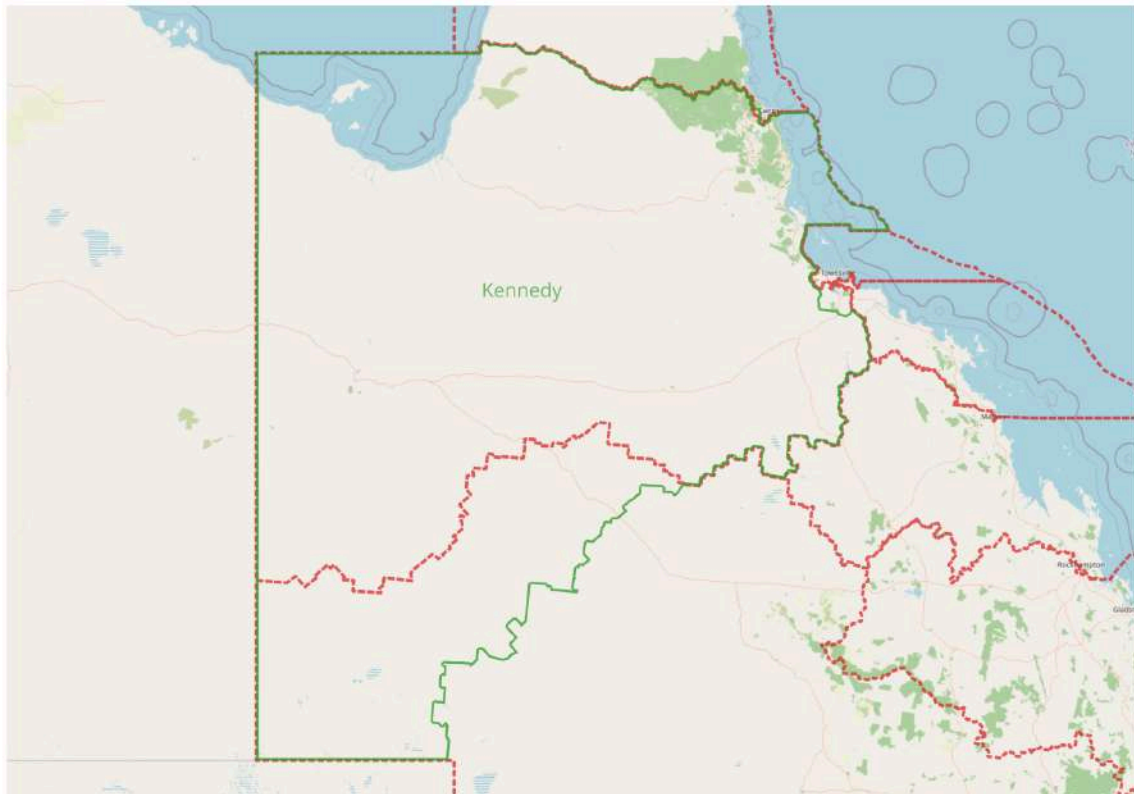

Gains

Maryborough outer areas north of Maryborough Biggenden Rd and west of Saltwater Creek Road from **Wide Bay**.

Rationale

Movement of population into **Flynn**, requires a small increase elsewhere. Aldershot is currently part of **Hinkler**, this proposal brings in more the neighbouring suburbs to unite the community of interest

Kennedy

Loses

Alice River and Gumlow to **Herbert**. Communities north of Reid River (Mt Elliot, Ross River, Oak Valley, Woodstock and Majors Creek) to **Dawson**.

Gains

Diamantina Shire and Winton Shire from **Maranoa**. Kuranda area west of Barron River from **Leichhardt**.

Rationale

The movement of Diamantina Shire and Winton Shire is proposed as these communities share a clear common interest and experience to other western Queensland areas (such as Boulia and McKinlay), then Crows Nest near Toowoomba in **Maranoa**. Likewise, the proposal to remove outer suburbs near Townsville is because those communities share a common interest and experience with those in **Herbert** and the nearby city of Townsville rather than Mt Isa. This shift does represent a large increase in land area but relatively fewer electors moving.

Bringing the Kuranda area into **Kennedy** supports connecting more of that community with the local government centre in Mareeba

Leichhardt

Loses

Kuranda area west of Barron River to **Kennedy**

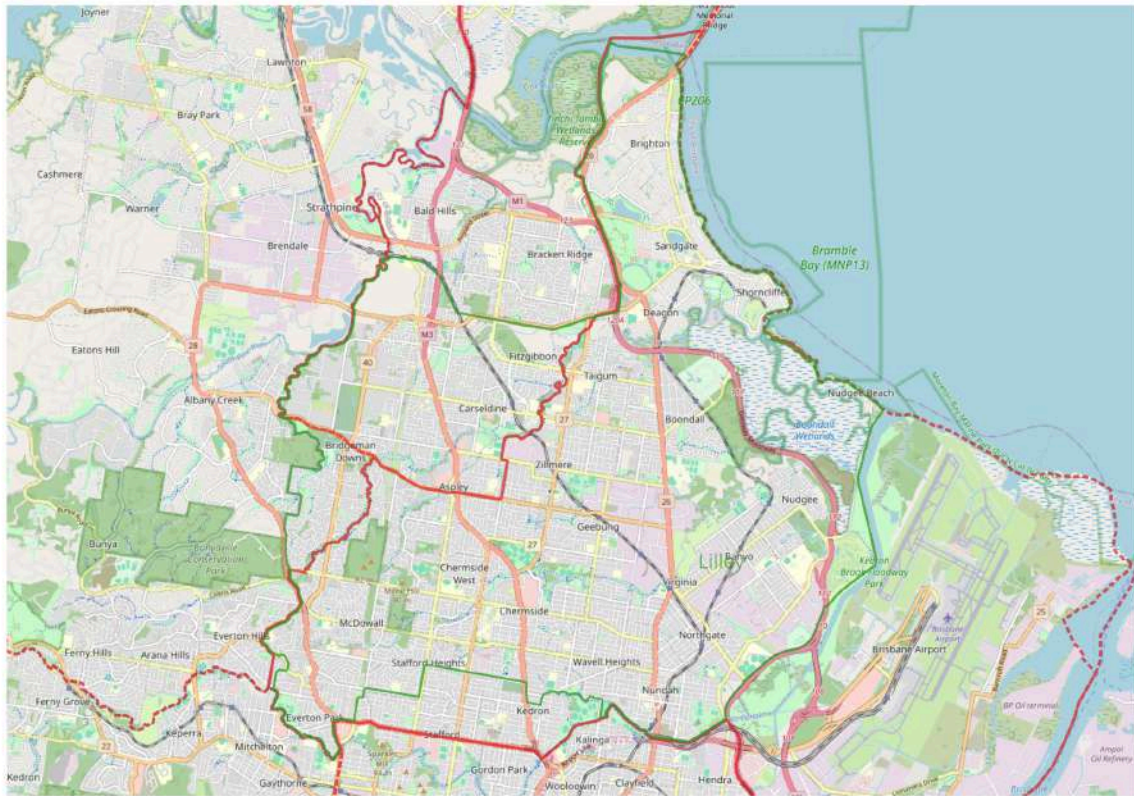

Gains

No Gains

Rationale

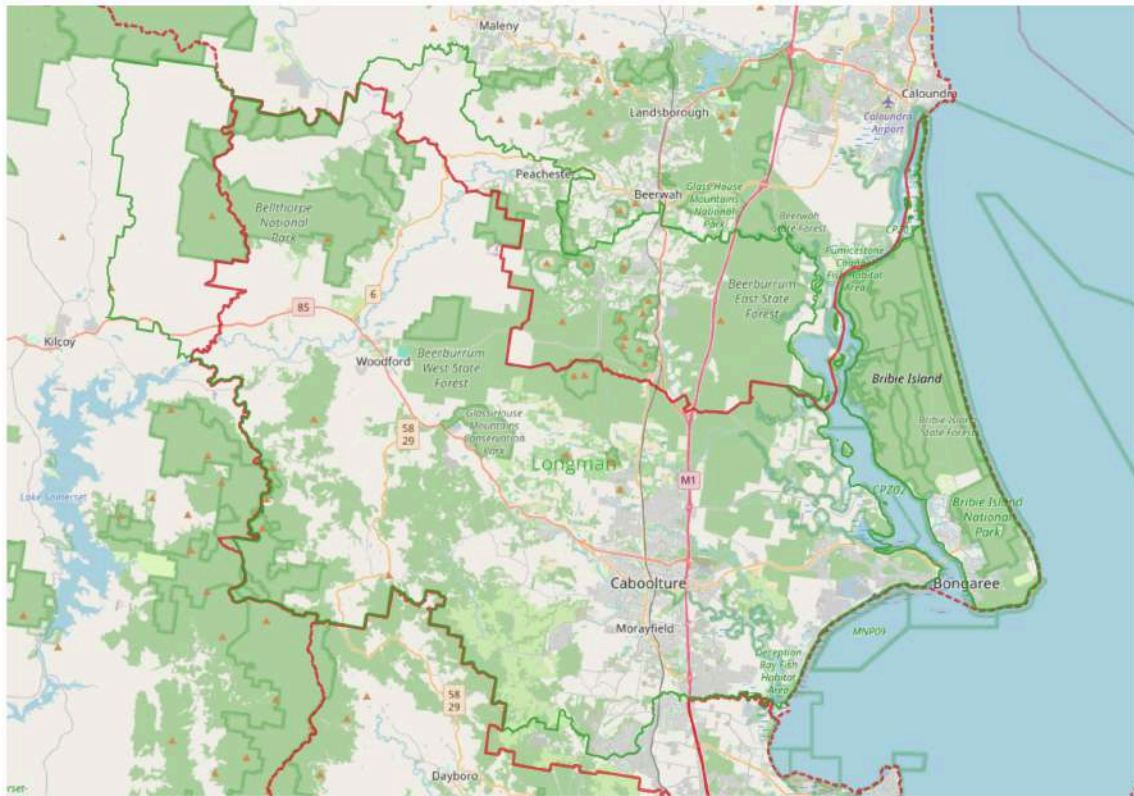

Bringing the Kuranda area into **Kennedy** supports connecting more of that community with the local government centre in Mareeba.

Lilley

Loses	Stafford west of the road reserve (Leach St) and south of Redwood St, Stafford Heights and Kedron east of Abbley Rd and south of Wilgarning St to Gympie Rd, and the remainder of Kedron south of Edinburgh Castle Road Park from Brisbane .
Gains	Remainder of Bridgeman Downs in Brisbane City from Dickson . Communities of Aspley, Carseldine, Fitzgibbon, and parts of Bald Hills south of the North Coast Train Line and Telegraph Road from Petrie .
Rationale	The communities of Carseldine and Fitzgibbon are relatively isolated from the rest of Petrie, and this move retains the communities as a connected whole and supports reuniting Aspley, previously split across two electorates, down the middle of its primary commercial and service centre.

Longman

Loses

Dakabin south of Boundary Rd, Narangba south of New Settlement Rd and Raynbird Rd to **Dickson**. Nangangba west of Burpengary Rd, and Burpengary to **Petrie**.

Gains

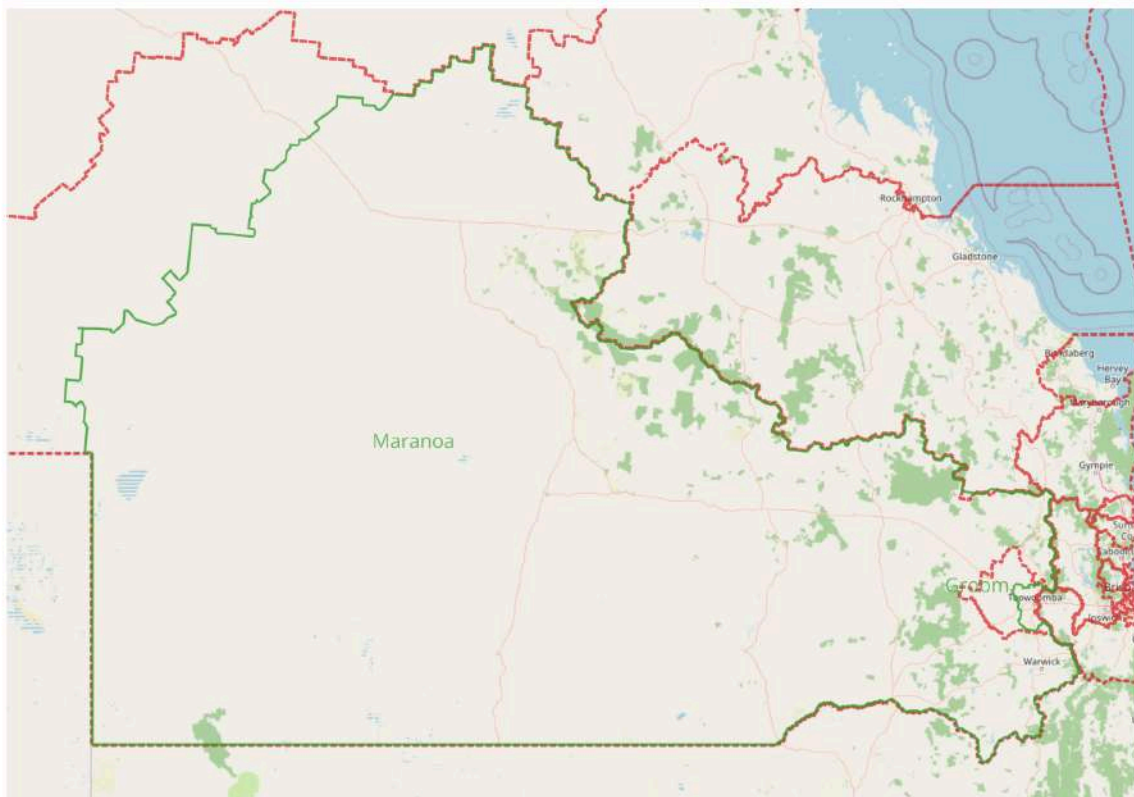

Beerburum, Glass House, and Peachester from **Fisher**. Sandy Creek from **Blair**.

Rationale

Maintaining the connection between Beerburum and Glasshouse and surrounding communities by moving these as a group. Peachester sits on the Stanley River; the communities along the Peachester and Kilcoy Beerwah Rd are retained by moving as a block.

Sandy Creek Community sits between Kilcoy and Woodford; moving the community together supports maintaining the communities of interest, along Sandy Creek Rd

Maranoa

Loses

Diamantina Shire and Winton Shire from **Maranoa**.

Gains

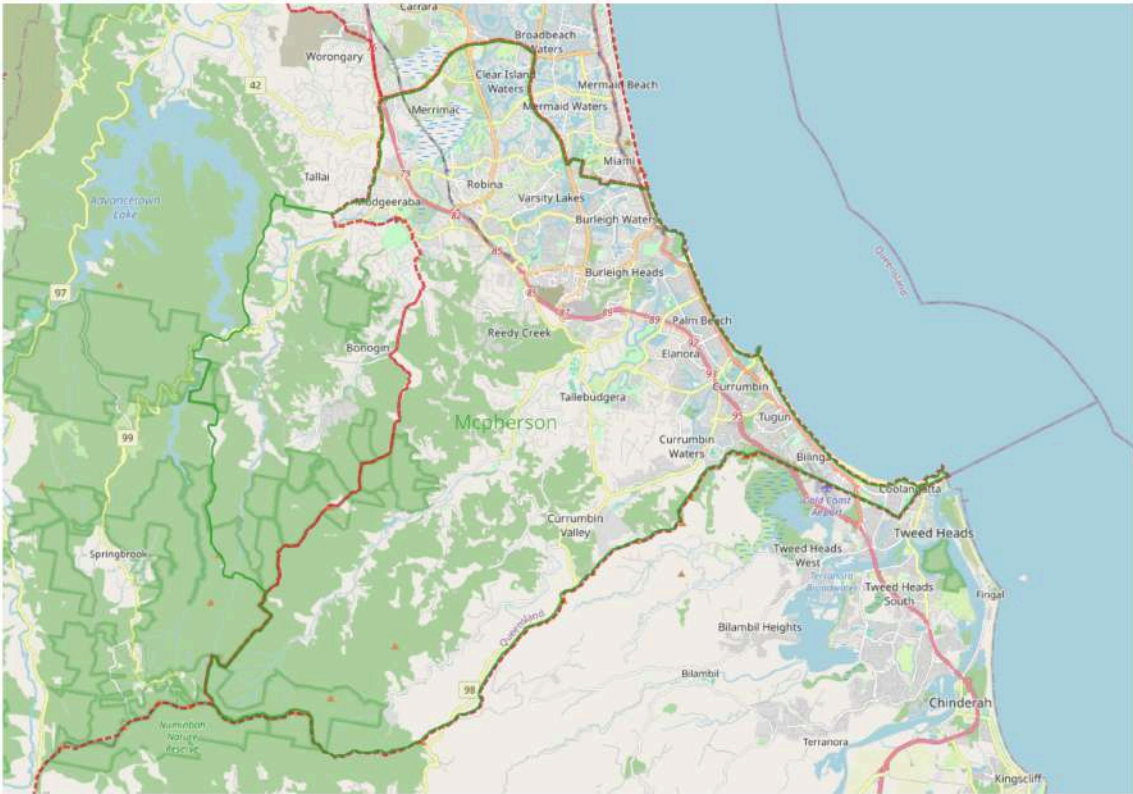

Outer Toowoomba regional areas to **Maranoa**, such as Biddeston, Goombungee, Hirstglen, Pittsworth, Southbrook.

Rationale

As noted with **Groom**, Significant pressure on **Maranoa** for elector growth means large sections of outer Toowoomba region have been moved out of **Groom**. Maranoa already represents a large portion of Toowoomba Region, and this is more desirable than splitting another region.

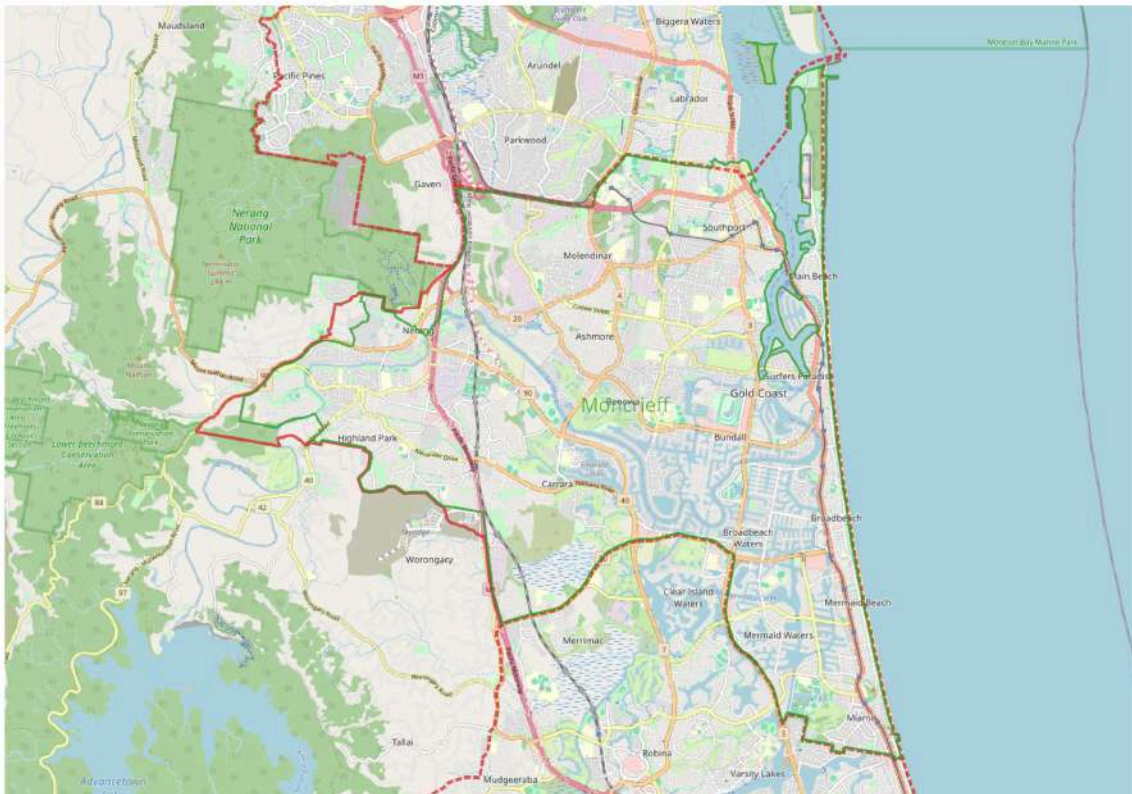

As mentioned with **Kennedy**, the removal of Boulia and Winton Shire's supports stronger electorates arranged around communities of interest with a shared experience, rather than distant communities in south-eastern Queensland, who do not face the same challenges.

McPherson

Losses	No Losses.
Gains	Bonogin and Neranwood from Wright .
Rationale	Bonogin and Neranwood are both significantly disconnected from the rest of right, with the primary economic and service centres being east in Mudgeeraba and the Gold Coast.

Moncrieff

Losses

No Losses.

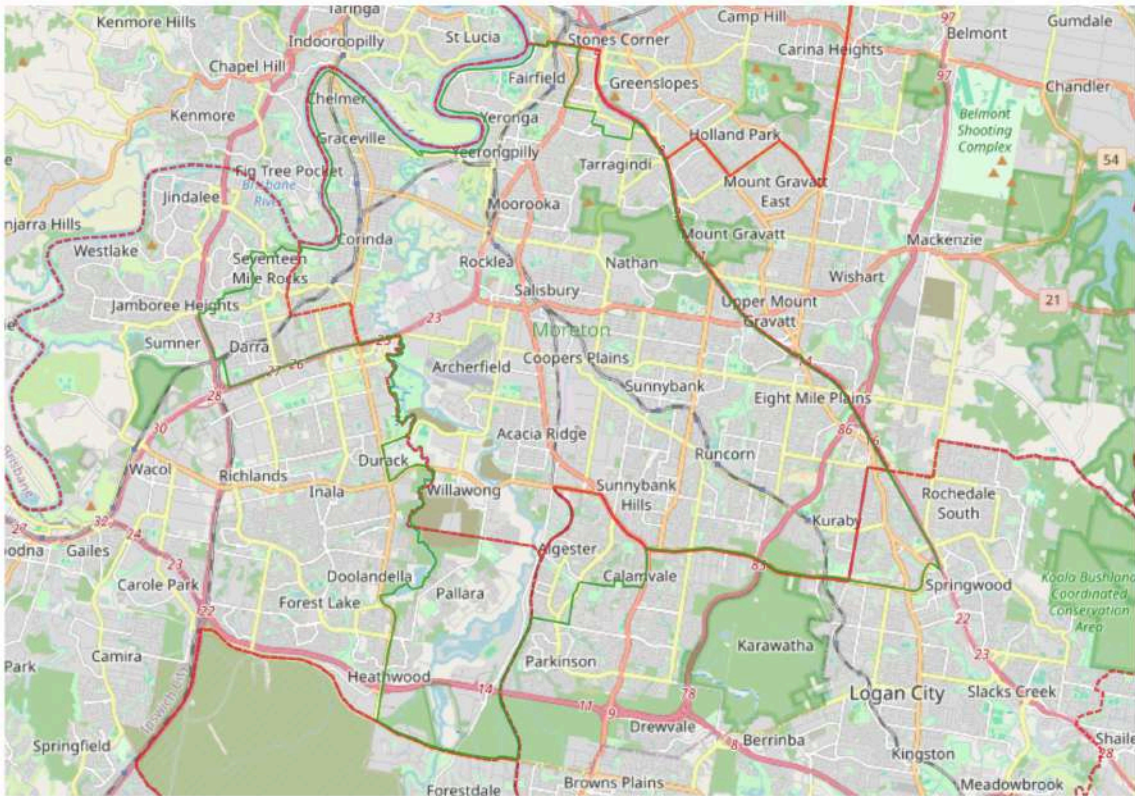

Gains

Northern point of South Port from **Fadden**.

Rationale

Small section of Southport that is physically disconnected from **Fadden**.

Moreton

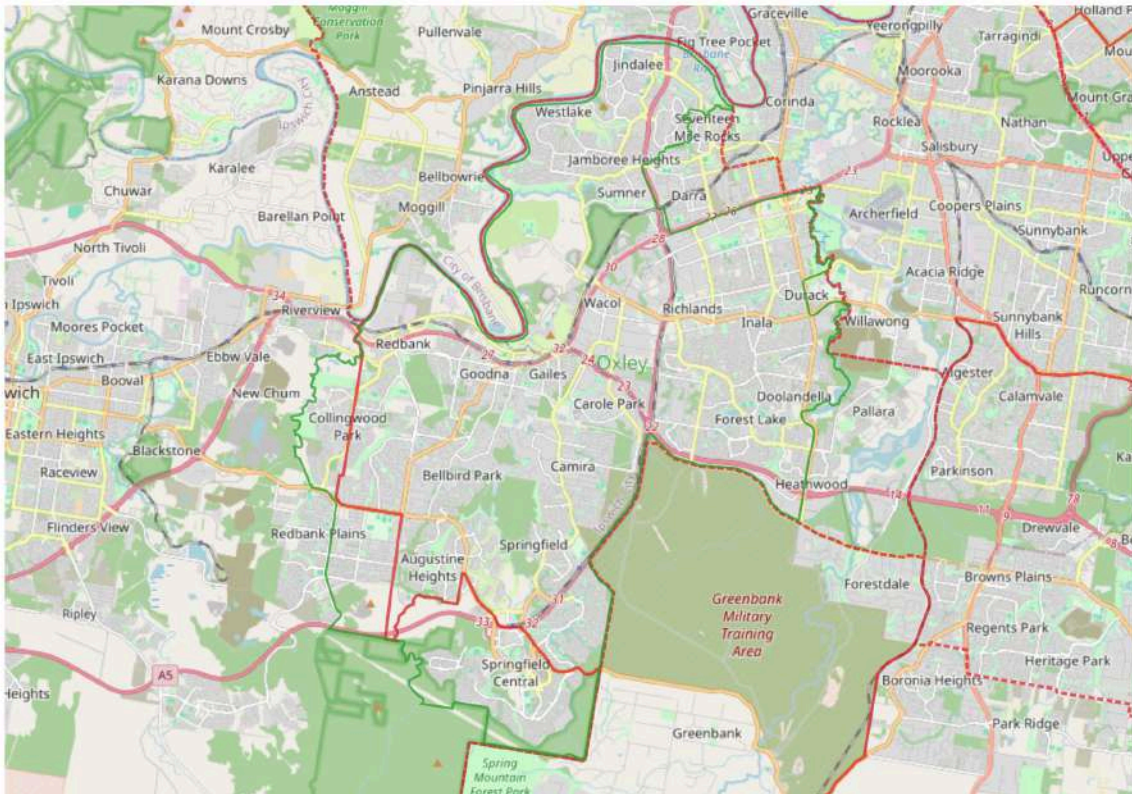

<p>Loses</p>	<p>The parts of Annerley, Ekibin, and Wellers Hill communities east of Ipswich Rd and north of Waterton, Sexton and Esher St to Griffith.</p>
<p>Gains</p>	<p>The remainder of Oxley (suburb), Seventeen Mile Rocks, and Dara east of Jindallee Creek and north of Ipswich Rd from Oxley. Willawong, Heathwood and Palara east of Blunder Creek From Oxley.</p> <p>Underwood and Parts of Algester along Laurel Oak Drive, north of Calamvale District Park, and Beniham Street from Rankin.</p>
<p>Rationale</p>	<p>Following the strong natural boundary of Jindalee Creek, the community in Oxley suburb is reunited, having previously been split. Seventeen Mile Rocks and Dara retain a contiguous connection with the rest of their electorate, while the distinct community in Mount Ommaney and surrounds retain connection with itself.</p> <p>The name Oxley for a suburb and electorate may be confusing, and the commission may wish to investigate whether changing or moving a federation name is necessary. As it stands, the suburb is already split by current boundaries along an artificial residential road, which can confuse electors.</p> <p>Pallara joining Moreton supports the industrial parts of Acacia Ridge being joined and reuniting the small neighbourhood previously split along Brookbent</p>

Rd.

The northern part of Algester rejoins a Brisbane City-focused electorate, and reconnects it with the major community hubs in Acacia Ridge and Sunny Bank Hills. It also retains the community of interest by being the catchment for Algester State School and an even proportion of Calamvale Community College.

Adding Underwood connects it with the neighbouring suburb of Kuraby, which was previously separated by the artificial boundary of a local government area (and is ignored just to the south) and isolated from **Moreton** by the Gateway Motorway. Underwood is the natural hub for Kuraby as the northern Logan commercial and service centre.

Oxley

Loses

The remainder of Oxley (suburb) and Dara East of Creek and north of Ipswich Rd to **Moreton**. Willawong and Pallara east of Blunder Creek to **Moreton**.

Gains

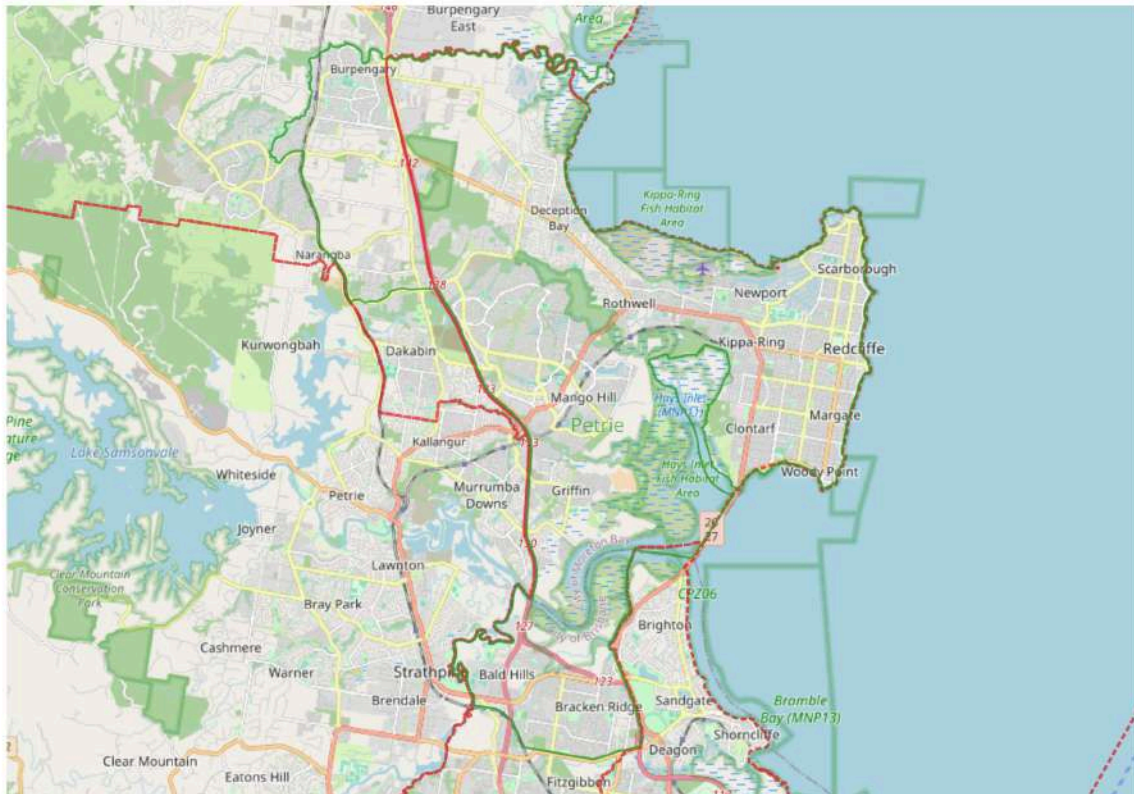

The remainder of Collingwood Park, Redbank Plains east of School Road and Springfield Central are transferred to **Oxley**.

Rationale

Reuniting the White Rock-Spring Mountain growth area by adding Springfield Central from **Blair** helps keep a rapidly growing community connected, with Springfield Central as its natural hub for community and services.

The western section of Collingwood Park was previously isolated and can now be reconnected. School Road acts as the best natural boundary for **Oxley** to take some of Redbank Plains.

Petrie

Loses

Communities of Aspley, Carseldine, Fitzgibbon, and parts of Bald Hills south of the North Coast Train Line and Telegraph Road to **Lilley**.

Gains

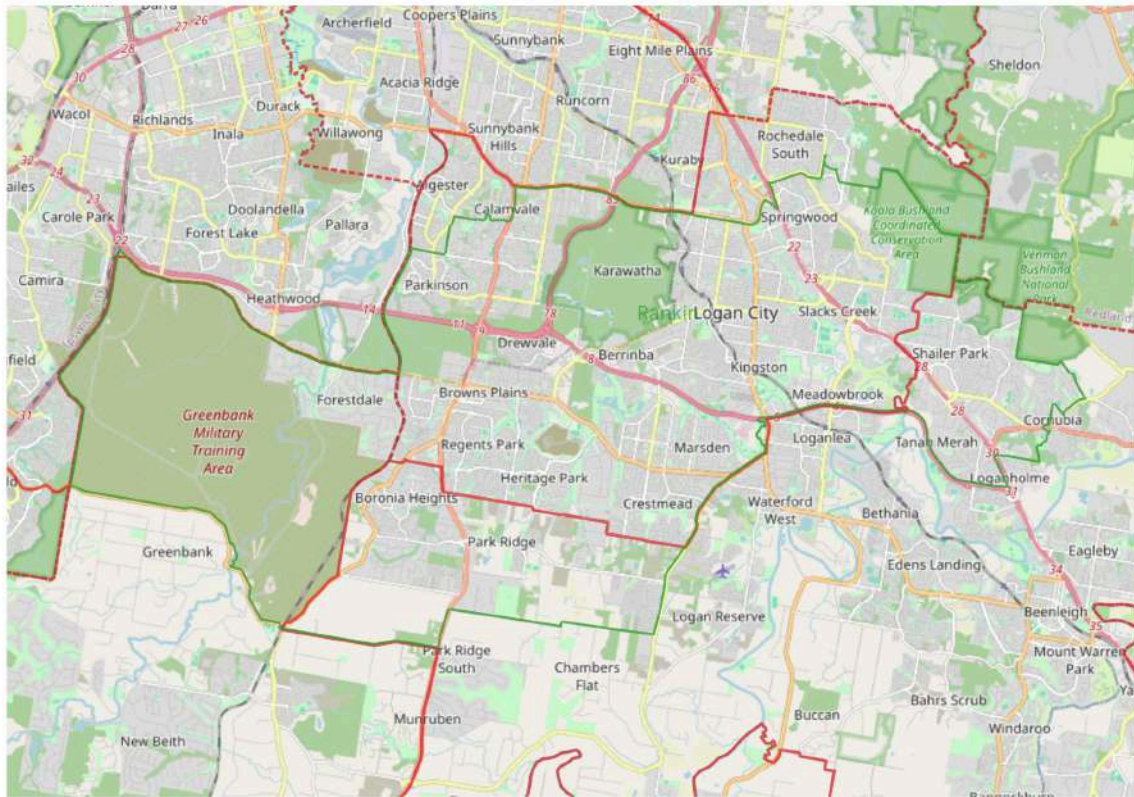

Narangba west of Burpengary Rd, and Burpengary from **Longman**

Rationale

Extending the current strong northern boundary of Burpengary Creek, **Petrie** reunites parts of Burpengary previously split by the M1. This boundary supports reorienting **Longman** around Caboolture and the significant growth this area will see.

Petrie takes in an isolated part of Narangba and the areas west of Burpengary Road. This western section is a distinctly different development theme and community and should remain contiguous.

Rankin

Losses

Rochdale South north of Springwood Road and Priest Gully from **Rankin**. Underwood and Parts of Algester along Laurel Oak Drive, north of Calamvale District Park, and Beniham Street to **Moreton**.

Gains

Park Ridge and Boronia Heights from **Forde**. Forest Dale from **Wright**

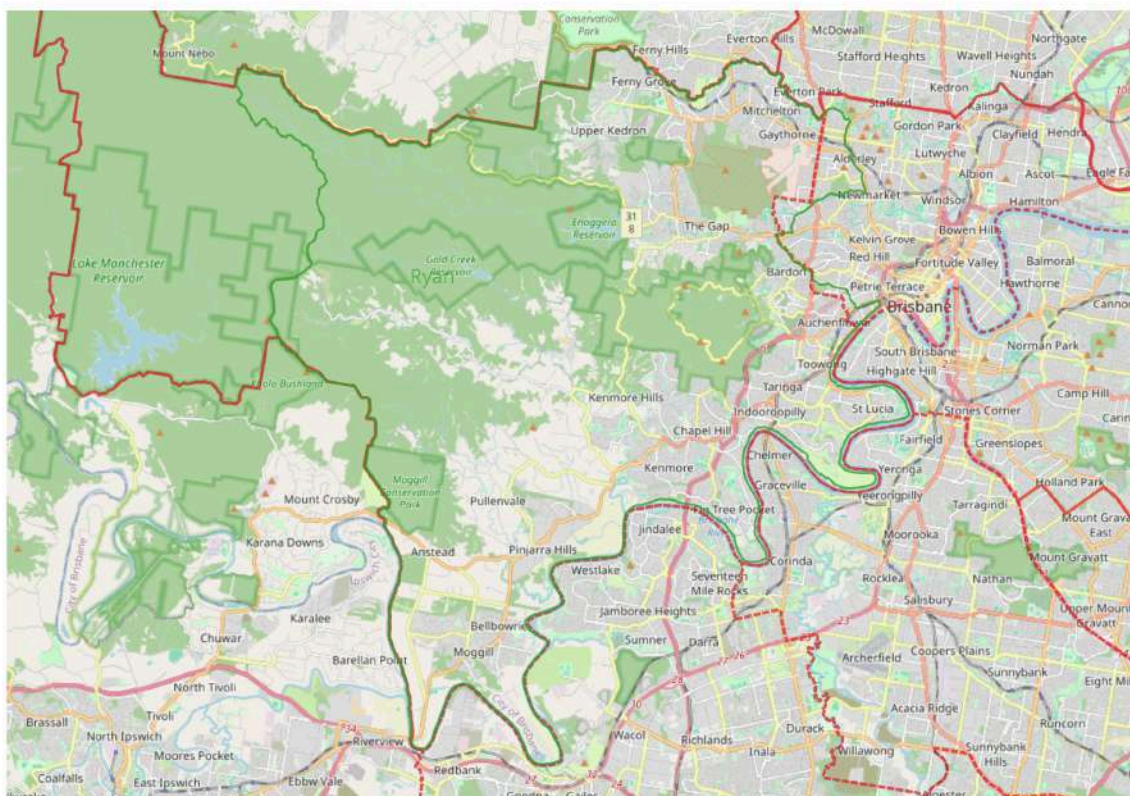

Park Ridge is expected to experience significant growth in the near future; previous boundaries separated these communities from the established community centres to the north. This will take time to establish in Park Ridge itself.

Rationale

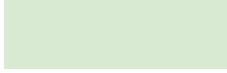

Including Forest Dale and Boronia Heights supports their continued connection with neighbouring communities and the natural community centres to the north and east in **Rankin**.

The Greenbank training area is included in the ranking because of its northern access, but it does not need to remain in Rankin if its southern access is more important.

Ryan

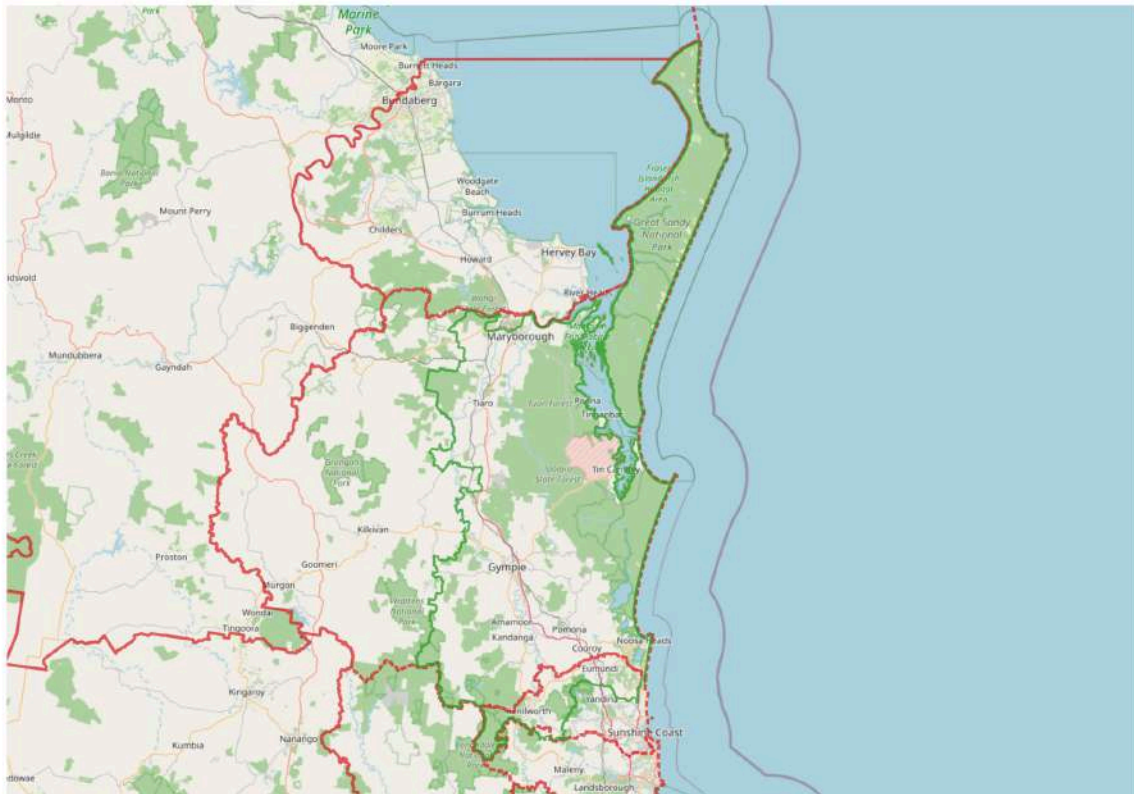

Loses	No Losses
Gains	<p>Milton south of Milton Rd and east of Baroona Rd, Paddington East of Feinberg Rd and Empress Tce, Ashgrove north of Glory Street, Giraween Grv and Acacia Dr, and the remainder of Enoggera north of Enoggera Creek and west of Enoggera Rd from Brisbane.</p>
Rationale	<p>We propose Milton remain united as a contiguous community along the river to the inner city bypass, with a distinct dense urban character and community.</p> <p>The community in Rosalie south of Fienberg Rd has its natural centre on the Rosalie Shopping area on Baroona Road, uniting the community and giving it a central focus point.</p> <p>We propose adding the section of Ashgrove north of Glory Street, Giraween Grv, and Acacia Dr to Ryan. This would help resolve isolated parts of nearby neighbourhoods, such as the community between Enoggera Creek and Fraser Road, and improve the contiguous parts of Ryan.</p> <p>Extending the current natural boundary of Enoggera Creek, we propose that the remainder of the suburb join Ryan as a single community of interest. Centred on the Enoggera Barracks and the strong community of Veterans in the area. This also reunites the communities that live along Kedron Brook and the Ferny</p>

Grove train line.

Wide Bay

Loses

Maryborough outer areas north of Maryborough Biggenden Rd and west of Saltwater Creek Road To **Hinkler**.

South Burnett hinterland communities, including Aramara, Kilkivan, Goomeri and the remainder of the South Burnett Local Government Area to **Flynn**.

Gains

Northern communities along Eumundi Kenilworth Rd, such as Kenilworth, Belli Park, Eumundi and Doonan, are moved from **Fairfax**, along with Obi Obi in the west and Peregrin Springs.

Rationale

As proposed for **Flynn**, the South Burnett and hinterland regions are proposed to be joined together and moved into **Flynn**.

The outer areas of Maryborough are proposed to be united as a community of interest where previously electors in Oakhurst and Aldershot were separated by the current boundary.

Western Sunshine Coast hinterland communities are proposed to be moved to Wide Bay, the communities along the Mary River and Belli Creek are connected via the Eumundi Keilworth Rd. The Peregrin Springs and Peregrin Beach are proposed to be united as they share a common coastal community of interest and are surrounded by the environmental reserves and national parks.

Wright

Loses

Yarrabilab and Logan Village east of Waterford Tamborine Rd to **Forde**. Lockyer Valley areas north of Lockyer Creek, and Tenthill Creek district along Mt Sylvia Rd to **Groom**. Bonogin and Neranwood to McPherson. Forest Dale from **Wright**

Gains

Grandchester, Lanfield, and Tallegalla east Rosewood Warrill View Road and north to the Warrego Highway move to **Wright**.

Significant growth in the Ripley Valley and Jimboomba areas supports **Wright** reducing in size.

Rationale

Grandchester, Lanfield, and Tallegalla are proposed to be added to **Wright** to support greater contiguity of smaller communities, and between Scenic Rim and Lockyer Valley population centres.

Estimated Elector and Projected Electors based on SA1

** Note that where electorates fall below the required threshold, we expect split SA1s able to make up the difference.

Electorate ↓	# electors	Projected Electors	Recommend Redistribution # electors	Recommend Redistribution Projected Electors
